

SKYfactor
Benchworks™

Assessments

SKYFACTOR BENCHMARKS ASSESSMENT TERMS & CONDITIONS

Revised 3/25/2015

Confidentiality of Participant's Results.

(1) Skyfactor may share Participant's results with other institutions as part of its benchmarking services provided that Skyfactor shall disguise the identity of Participant when using Participant's results for benchmarking by various methods which may include: (1) scrambling the order of institutions; (2) refraining from labeling institutions; (3) providing comparisons only within groups of institutions; and (4) refraining from the release of raw data for individual institutions.

(2) Participant may share and utilize Participant's results in any respect subject to the following restrictions: Names of comparison institutions, question and factor ranking, question and factor means, comparison with "Select 6" comparison institutions, Carnegie classification, "All Institutions" or any other grouping in the study is considered "Restricted Information". Restricted Information may only be disclosed to: (i) Offices or staff internal to Participant (including its advisory boards/committees), (ii) external consultants of Participant, to the extent necessary for the performance of the consultant's services, and (iii) regional/national/discipline specific accrediting organizations or legislative review processes, if applicable. Participant shall inform all such parties of the confidentiality requirements.

THE POWER OF ASSESSMENT AND BENCHMARKING

We appreciate your interest and participation in the Benchworks Undergraduate Business Exit Assessment. Rigorous, research-based assessments can unlock the power of assessment results to improve your institution's performance. Our assessments provide targeted, analysis-backed insights to measure your performance and guide your improvement efforts. Skyfactor's Benchworks analysis identifies where you should focus your time, money and resources to improve the overall quality of the student experience and help each student thrive.

OUR MISSION

To empower college educators to positively impact student retention, success, learning and satisfaction; to improve the overall quality of the college student experience.

Since 1994, Skyfactor has been dedicated to improving retention, student success, and the quality of the college student experience. Skyfactor has empowered over 1,500 college and universities to impact student development, learning, retention and satisfaction through the Mapworks® student success and retention platforms, and through national benchmarking assessments for accreditation and continuous improvement. Mapwork's retention effectiveness is grounded in theory, research and statistical methods. Benchworks assessment programs are rooted in accreditation and professional standards and in principles of continuous improvements. Skyfactor offers over 60 nationally benchmarked academic and student affairs assessments as well as Mapworks, a comprehensive student success and retention platform. Skyfactor's Mapworks and Benchworks assessments are the essential foundation of an effective assessment and student success initiative. To learn more about Skyfactor and our history, please visit <http://www.Skyfactor.com/about/history>.

Commitment to Assessment // Your institution partnered with Skyfactor Benchworks to participate in the Benchworks Undergraduate Business Exit Assessment. Assessment is a process to collect information to better understand the perceptions of your institution's effectiveness from the viewpoint of your campus constituents. Assessment information answers important questions such as "How effective is our program?" or "Where should we focus resources to improve?"

Focusing only on your institution's performance can be limiting; questions such as "Is improvement possible?" are difficult to answer without benchmarking information. Benchmarking, a key feature in this project, provides comparisons between your institution and others (external benchmarking), between successive years (longitudinal benchmarking), and between groups (internal benchmarking). Benchmarking allows you to identify comparative strengths and weaknesses.

Closing the Assessment Loop // Successful assessment projects combine data collection, analysis, action planning, and implementation of actions. Unfortunately, most assessment projects end after studying the assessment results without creating and implementing actions for improvement. We recommend the following steps:

CONDUCT ASSESSMENT // Using a survey instrument that reliably measures areas important to your profession is a critical first step.

IMPLEMENT ACTION PLAN // Assign a person(s) to each action and hold them accountable for their area of responsibility.

ANALYZE INFORMATION // Carefully review the analysis (both written and online) to understand issues facing your program and where your program should focus its attention.

CREATE ACTION PLAN // Develop an Action Plan for program improvement based on these results.

Skyfactor provides two reporting platforms for your convenience.

Skyfactor Benchworks' Written Report // Skyfactor Benchworks' written report is segmented into four major areas:

- **Confidentiality Statement:** (Located on the first page of this written report.) All results are confidential and may be reproduced and utilized only for continuous improvement purposes on your campus.
- **Assessment Summary:** This section contains supplemental information to assist you in understanding the results such as a glossary of terms, list of survey questions and factors, description of the statistical analysis used, external benchmarking groups, and survey response rates.
- **Executive Summary:** Skyfactor recommends you begin your review of the results with this section. All the major components are pulled together to give an excellent overview of your institution's current performance, external benchmarking comparisons, longitudinal trends, and areas on which to focus resources for improvement. Be sure to identify individual factors key to institutional improvement and any populations (e.g., gender, race) with specific issues in order to target actions as necessary.
- **Individual Factor Analysis:** Once key factors are identified, explore them in-depth to better understand their current and past performance. In addition, detailed information of the factor's scaled questions is reported. Actions should be targeted towards scaled questions which are more tangible and directly actionable.

Skyfactor Benchworks' Online Reports // If you would like to delve deeper into your assessment information, Skyfactor Benchworks' Online Reports provides additional information (e.g., population characteristics) and interactive tools (e.g., filtering and cross-tabs) to enrich your understanding of the results.

Summary // Assessment and benchmarking helps focus your time and financial resources for greatest impact and moves your institution from a debate about what is wrong to a discussion of possible solutions. Closing the assessment loop by creating and implementing improvement actions guarantees forward progress.

TABLE OF CONTENTS

	Assessment Summary	
	Executive Summary Overall Satisfaction Overall Learning Overall Program Effectiveness Professional Standards	
SATISFACTION	FACTOR 1 // Quality of Instruction	
	FACTOR 2 // Aspects of Courses	
	FACTOR 3 // Breadth of the Curriculum	
	FACTOR 4 // Co-Curricular Activities	
	FACTOR 5 // Advisor	
	FACTOR 6 // Facilities	
	FACTOR 7 // Classmates	
	FACTOR 8 // Career Services	
LEARNING	FACTOR 9 // Practical Competencies	
	FACTOR 10 // Cognitive Complexity	
	FACTOR 11 // Ethical and Legal Responsibilities	
	FACTOR 12 // Financial Information	
	FACTOR 13 // Data-Driven Decision-Making	
	FACTOR 14 // Organizational Behaviors	
	FACTOR 15 // Multicultural and Diversity	
	FACTOR 16 // Domestic and Global Economies	
	FACTOR 17 // Use and Manage Technology	
	FACTOR 18 // Supply Chain	
OVERALL	FACTOR 19 // Overall Satisfaction	
	FACTOR 20 // Overall Learning	
	FACTOR 21 // Overall Program Effectiveness	
MISC	Non-Factor Questions	

Below is a compilation of terms used in this report.

% Total // Relative size of the respondent population.

All Institution Mean // Mean of the aggregated results of all participating institutions.

Carnegie Class Mean // Mean of the aggregated results of the institutions in your Carnegie Classification. If the number of institutions in the class is two or fewer, the results will not be reported to protect anonymity.

Categorical Questions // Categorical questions are closed-ended questions that ask the respondent to choose an answer(s) that best represent their situation. Typical categorical questions are age, gender, and class standing

Contribution // The “contribution to the variance” as explained through the regression analysis. Essentially, this refers to the amount each predictor contributes to the overall variance. The larger the contribution, the larger the impact the factor has on the dependent factor.

Factor // A group of statistically-related questions which describe a broad concept more completely than just a single question.

Goal // The goal value, set by Skyfactor, is a value of 5.50 on a 7-point scale or a value of 75% on the performance scale. Different performance indicators are given based on its relationship with the goal. indicates that the goal was met. indicates the goal is within reach. indicates the performance is well below goal.

Mean // The average (the sum of the values divided by the number of respondents) of the item.

Mean Range // The difference between the minimum mean (Min) and maximum mean (Max) across populations provides a range of means which gives a measure of the variation of the data.

N // Number of respondents to that item.

Negative Correlation (NEG) // The relationship between an independent factor and the dependent factor where the factors move in opposite directions. In other words if the factor’s mean decreases, then we would expect the mean of the overall performance factor to increase.

Non-Factor Questions // Scaled questions that are relevant but not statistically related to a factor. Results of these questions are reported individually.

Not a Predictor (NP) // A factor which does not contribute to the variance thus is not a predictor of the dependent variable. Because this factor is not a predictor, changes to its performance will not impact the dependent factor.

Not Reported (NR) // In order to protect participant anonymity, Skyfactor will not report population data when the number in that population is five or fewer. In order to protect institutional anonymity, Skyfactor will not report performance values for the Carnegie Class if the number of institutions in the class is two or fewer.

Performance // Mean scaled from 0-100%. The translation is: “1” on the 7-point scale equates with 0% performance, “4” equates to 50% performance, and “7” equates to 100% performance.

Predictor // Predictor status of the factor as calculated from the regression analysis. The strongest predictor is labeled as “1st”, the second strongest is “2nd”, and so forth. We label factors that do not contribute to the variance as “NP” (non-predictor).

Rank // Sorting the institutions from highest performance to lowest performance, your institution’s rank is determined. Note, your institution’s data is included when we calculate your institution’s ranking within that comparison group (e.g., your institution’s Select 6 rank is out of 7 institutions since your institution is included in the rank).

Response Rate // The number of participants who completed the assessment divided by the total number of participants attempted to survey.

Scaled Questions // These survey questions rely on a 1-to-7 Likert scale with "1" indicating either strong disagreement or being very dissatisfied and "7" indicating either strong agreement or being very satisfied. This type of question is designed to gather perceptions of the participants across a variety of content areas.

Select 6 Mean // Mean of the aggregated results of the Select 6 institutions.

Standard Deviation // The measure of the variation in response values within that item. Small standard deviations indicate consistency among respondents. In these cases, any intervention taken can be the same for all populations since respondents are responding similarly. Large standard deviations indicate wide variability among respondents. A deeper understanding of which populations are creating this variability is necessary before an intervention can begin. May be abbreviated as Std Dev in reporting.

Statistical Significance (Stat Sig) // The indication of a statistical difference in means. Statistical testing is conducted between your institution's current results and the results from previous years to determine if differences in the means are statistically significant. ▲ indicates where your institution performed statistically higher; = indicates no statistical difference; ▼ and indicates where your institution performed statistically lower. Statistical testing is also conducted between populations and between other institutions when applicable.

There are three types of questions used in this assessment: Categorical Questions, Scaled Questions, and Open-Ended Questions. Below is a full listing of the survey items grouped by question type.

Categorical Questions // Categorical questions are closed-ended questions that ask the respondent to choose an answer(s) that best represents their situation. Typical categorical questions are GPA, Class Standing, and Place of Residence. Below are the categorical questions asked in this assessment. In this written report, Skyfactor has chosen to report detailed information on a few key items marked with an asterisk; reporting by all categorical questions can be found in Skyfactor Benchworks' Online Reports.

- D001 // Gender *
- D002 // How old are you?
- D003 // What is your ethnicity?
- MR004 // What is your race (Choose all that apply.)?
- D005 // Race/Ethnicity (reporting only) *
- D006 // Are you an international student (Non-Resident Alien)?
- D007 // Did either of your parents/guardians graduate from college?
- D008 // Did you complete the majority of the business program as a full-time or part-time student?
- D009 // SAT/ACT Score *
- D010 // Cumulative GPA *
- D011 // Average Number of Hours Studied per Week
- D012 // Average Number of Hours Worked per Week
- D013 // Year Entered Into Business School
- D014 // Undergraduate Major/Area of Primary Interest
- D015 // What is your second major/area of study?
- D016 // While at this institution, did you participate in a study abroad program?
- D017 // While at this institution, did you participate in an internship?
- D018 // How often do you participate in programs and activities sponsored by the business program?
- D019 // Do you plan to pursue additional education?
- D020 // What are your immediate plans for employment upon graduation from this institution?
- D028 // Which best describes your current stage in the employment search process?
- D030 // What is the total amount of loans taken to finance this degree?
- D031 // Which best describes your plans to continue your education?
- D032 // Which best describes your current stage in the application process?
- D106 // To what extent was your program completed online?

Scaled Questions // These survey questions rely on a 1-to-7 Likert scale with "1" indicating either strong disagreement or being Not at all and "7" indicating either strong agreement or being Extremely. These questions are designed to gather perceptions of the participants across a variety of content areas. The scaled questions from the survey are listed below.

To what degree did your internship provide:

- Q023 // A valuable learning experience
- Q024 // An important career experience

To what degree:

- Q025 // Would you recommend this internship experience to a close friend?

To what degree did courses in the business program provide:

- Q034 // Teaching in your major courses
- Q035 // Feedback on assignments (other than grades) received from instructors in required courses
- Q036 // Encouragement to participate in class
- Q037 // Opportunities for practical experiences (e.g., service learning, partnerships with industry in course projects)
- Q038 // Opportunities for interaction with practitioners
- Q039 // Real world experience/content
- Q040 // Feedback on assignments (other than grades) received from instructors in major courses

Regarding the faculty in the business program, to what degree did they:

- Q041 // Get to know you
- Q042 // Take an interest in your progress toward graduation
- Q043 // Make themselves accessible outside of class

To what degree are you satisfied with your advisor's:

- Q044 // Availability
- Q045 // Knowledge of requirements
- Q046 // Helpfulness of recommendations
- Q047 // Advisor's interest in students' progress

How satisfied were you with the quality of teaching in core subject matter:

- Q048 // Accounting
- Q049 // Business law/legal environment
- Q050 // Business policy/strategy

- Q051 // Economics/business economics
- Q052 // Finance
- Q053 // Management, human resources/organizational behavior
- Q054 // Information systems
- Q055 // International business
- Q056 // Marketing
- Q057 // Operations
- Q058 // Statistics

Regarding your experiences in the business school, how satisfied are you with:

- Q060 // Student organization activities
- Q061 // Leadership opportunities

Regarding the facilities at the business school, how satisfied were you with the quality of the:

- Q062 // Classrooms
- Q063 // Library services
- Q064 // Computing services
- Q065 // Use of instructional technology in course delivery

Regarding your fellow students, how satisfied were you with their:

- Q066 // Academic quality
- Q067 // Ability to work in teams
- Q068 // Level of camaraderie
- Q069 // Ability to provide peer-to-peer help with assignments

How satisfied were you with:

- Q070 // Assistance in finding an internship (Please mark N/A if you did not seek an internship)
- Q071 // Assistance in preparation for permanent job search
- Q072 // Access to school's alumni to cultivate career opportunities
- Q073 // Number of companies recruiting on campus
- Q074 // Quality of companies recruiting on campus

To what extent did the business program enhance your:

- Q076 // Oral presentation skills
- Q077 // Writing skills
- Q078 // Reflective thinking skills
- Q079 // Ability to think critically
- Q080 // Ability to define problems
- Q081 // Ability to solve problems

To what degree did the business program enhance your ability to:

- Q082 // Apply financial theories to real-world applications
- Q083 // Analyze financial information in real-world applications

To what degree did the business program enhance your ability to:

- Q084 // Collect relevant data
- Q085 // Statistically analyze data
- Q086 // Interpret data in a real-world context
- Q087 // Use data to make decisions

To what degree did the business program enhance your ability to:

- Q088 // Work in teams
- Q089 // Be an effective manager
- Q090 // Be an effective leader
- Q091 // Build professional relationships

To what degree did the business program enhance your ability to:

- Q092 // Make ethical decisions
- Q093 // Understand legal responsibilities

To what degree did the business program enhance your ability to:

- Q094 // Understand multicultural issues
- Q095 // Work with diverse populations (i.e., cultural, ethnic, political)
- Q096 // View issues from other people's perspective

To what degree did the business program enhance your ability to:

- Q097 // Make business decisions in a global economic environment
- Q098 // Make business decisions in a domestic economic environment
- Q099 // Understand the relationship between domestic and global economies

To what degree did the business program enhance your ability to:

- Q100 // Effectively use information technology
- Q101 // Manage information technology

Q102 // Understand business processes

To what degree did the business program experience enhance your understanding of how value is created through:

Q103 // Supply chain management and logistics

Q104 // The integration of goods, services and information in the production/distribution process

Q105 // Outsourcing a capability to an external supplier

To what degree did this your online courses provide:

Q107 // Easy-to-use software

Q108 // Software that was functional

Q109 // Interaction between you and your instructor

Q110 // Interaction among classmates

Regarding your experience at the business school, to what degree:

Q112 // How inclined are you to recommend your Undergraduate Business program to a close friend

Q113 // Did the business school provide a positive academic experience?

Q114 // Were you challenged to do your best academic work?

Q115 // Were you motivated to do your best academic work?

Q116 // Was the information you learned applicable to your future career?

Q117 // Comparing the expense to the quality of education, rate the value of the investment made in the Undergraduate Business degree

Open-End Questions // Open-ended questions are designed to encourage a full, meaningful answer from the respondent. Typical open-ended questions are “How can we improve this program?” Below are the open-ended questions asked on this survey; please access Skyfactor Benchworks' Online Reports to read or download respondents' answers.

LA021 // What was the name of the organization at which you had an internship?

LA022 // What was your role in your internship?

LA026 // What was the most valuable aspect of your internship experience?

LA027 // How can we help make the internship experience better for future students?

LA029 // If you have accepted a position, please tell us the organization name and your role.

LA033 // If you have decided where you'll be studying, please tell us the institution name and the program.

LA059 // How can we improve the quality of instruction?

LA075 // How can we improve our academic advising, facilities, or career services?

LA111 // How we can improve your online education experience?

LA118 // What did you like best about the business program?

LA119 // How can we improve the business program for future students?

LA120 // Which person(s) in the business program contributed most to your success?

Factors, also called constructs, are groupings of related scaled questions. Skyfactor utilizes factors for two important reasons:

- **Reduces complexity:** The number of questions in this assessment is large making analysis based solely on survey questions complex and unwieldy. The number of factors is significantly smaller, bundling the details and reducing the complexity of analysis;
- **Strengthen regression:** The focal point of Skyfactor's analysis, Recommendations for Improvement (based on a multi-variant linear regression), is weakened if too many variables are used. Factors, a significantly shorter set of variables, strengthen the regression analysis.

Factor Analysis // Factor analysis is a statistical technique used to derive factors. The basic assumption of factor analysis is that underlying dimensions, or factors, can be used to explain more complex phenomena. In measuring perceptions, the object is to combine several questions that, in concert, capture the notion for a particular topic, such as "Facilities".

Factor Reliability // Once it has been determined that a set of scaled questions do share a relationship and therefore constitute a factor, there is an additional (and necessary) statistical test to assess the psychometric soundness of the factor. We rely on Cronbach's Alpha to determine the internal consistency or reliability of any factor. A Cronbach's alpha of zero would mean that there is no internal consistency at all, i.e., subjects are likely to respond with any value on any of the questions in a factor with no discernible pattern. An alpha of 1 would mean that every subject answered every question comprising the factor consistently. This is a highly unlikely event. An alpha of .5 is considered acceptable; an alpha of .7 good; alphas in the .8 to .9 range are exceptional.

Below is a list of this assessment's factors and the corresponding Reliability (Chronbach's Alpha).

FACTOR NAME	QUESTION NUMBERS	RELIABILITY
FACTOR 1 // Satisfaction // Quality of Instruction	34-36	0.82
FACTOR 2 // Satisfaction // Aspects of Courses	40-43	0.82
FACTOR 3 // Satisfaction // Breadth of the Curriculum	37-39	0.85
FACTOR 4 // Satisfaction // Co-Curricular Activities	60-61	0.90
FACTOR 5 // Satisfaction // Advisor	44-47	0.93
FACTOR 6 // Satisfaction // Facilities	62-65	0.85
FACTOR 7 // Satisfaction // Classmates	66-69	0.90
FACTOR 8 // Satisfaction // Career Services	70-74	0.92
FACTOR 9 // Learning // Practical Competencies	76-78	0.81
FACTOR 10 // Learning // Cognitive Complexity	79-81	0.93
FACTOR 11 // Learning // Ethical and Legal Responsibilities	92-93	0.84
FACTOR 12 // Learning // Financial Information	82-83	0.94
FACTOR 13 // Learning // Data-Driven Decision-Making	84-87	0.94
FACTOR 14 // Learning // Organizational Behaviors	88-91	0.91
FACTOR 15 // Learning // Multicultural and Diversity	94-96	0.92
FACTOR 16 // Learning // Domestic and Global Economies	97-99	0.93
FACTOR 17 // Learning // Use and Manage Technology	100-102	0.93
FACTOR 18 // Learning // Supply Chain	103-105	0.94
FACTOR 19 // Satisfaction // Overall Satisfaction	112-113	0.92
FACTOR 20 // Learning // Overall Learning	114-116	0.88
FACTOR 21 // Overall // Overall Program Effectiveness	112-117	0.92
Non-Factor Questions	23-25, 48-58, 107-110	n/a

Skyfactor is dedicated to providing relevant statistical analysis which removes the guesswork from the reader. Making decisions on assessment information without fully understanding if the results are statistical, could lead to decisions with unintended consequences. In this report, we provide results from regression analysis and statistical testing of means.

Regression Analysis (Identifying Predictors) // A correlation establishes the relationship between two variables. Regression analysis, by contrast, allows us to determine the relationship between an assessment's dependent factor (in this assessment, Overall Program Effectiveness) and multiple independent factors (e.g., facilities, environment, etc.). If we suspect, for example, that Overall Program Effectiveness is related to a set of independent factors, we could simultaneously assess the extent to which all of these independent factors predict Overall Program Effectiveness. Beyond that, we can determine the exact weights for each of the independent factors, which allows us to identify which of the independent factors is most important, which is second, and so forth. We can further determine how much each independent factor increases our ability to predict Overall Program Effectiveness.

The first step in regression analysis is to identify which of the independent factors is the best predictor of Overall Program Effectiveness. Next, the analysis takes into account (controls for) the effect of the first predictor and then determines the second best predictor. This is an iterative process, which controls for all prior factors, then identifies the next predictor (e.g., the 3rd most important, 4th most important and so on).

Examining the output of this process allows us to identify the most important predictors among the dependent factors, those with more modest explanatory power, and finally those factors that contribute nothing to our understanding of the Overall Program Effectiveness.

We should note that while the factors in this latter category have no explanatory power, in a practical sense, they contribute greatly to our decision-making ability. Knowing what is not related to -- or predictive of -- Overall Program Effectiveness can be a valuable insight. Presumably, one would not allocate scarce resources to improve elements that are not related to Overall Program Effectiveness. Conversely, if we know the best predictors of Overall Program Effectiveness, investment in those elements would pay high dividends.

In reporting results of regression analysis, we discuss the "contribution to the variance". Essentially, this refers to how well we can explain a certain outcome (improving Overall Program Effectiveness) by using the factors. The higher the contribution, the stronger our conclusions about how well the factors we have identified help us understand what predicts a given outcome (in this case, improving Overall Program Effectiveness).

Statistical Testing of Means (T-Test) // The t-test determines whether the means of two data sets are statistically different from each other. The result of the t-test is a p-value that indicates how likely those results could happen by chance. A difference is identified as "significant" if the probability that the result could have occurred merely due to chance is less than 5%. All differences reported are significant at the $p < 0.05$ levels or better. Many are significant at the $p < 0.01$ (less than 1% of the results could have occurred due to chance) or $p < 0.001$ (less than 0.1% of the results could have occurred due to chance) level.

Statistical testing is conducted between your institution's results and the aggregate of your external benchmarking institutions (Select 6 institutions, Carnegie Class institutions, and all participating institutions). We also conduct statistical testing between populations and between subsequent years. In this report, we indicate if the test was statistical to $p < 0.05$ but do not provide individual p-values; p-values can be found in Skyfactor Benchworks' Online Reporting.

Benchmarking is the process of comparing your institution's performance against other institutions. National benchmarking assessments allow standards to be set and, through those standards, your institution can calibrate its effectiveness. Throughout this report (and Skyfactor's Online Reporting), you will find comparisons of your institution's results against those of your external benchmarking institutions (Select 6 institutions, Carnegie Class institutions, and all participating institutions). As you review these results, note the areas where your institution's outperforms your external benchmarks; these are areas to celebrate! The opposite may also be true; you may find areas where your institution underperforms your external benchmarks. This indicates that others may have a better approach or better implementation and improvement is possible.

Select 6 Institutions // A very important aspect of this benchmarking assessment is the comparison of your institution's results against four to six peer or aspirant institutions (regardless of the number of institutions selected, Skyfactor refers to this group as "Select 6"). In this report, we provide the aggregated information from these institutions. If you want to view an individual Select 6 institutional performance, please access Skyfactor Benchworks' Online Reports; however to protect anonymity, institutional names are not linked to results. Your Select 6 institutions are:

NOTE: Your institution was allowed to choose from institutions who participated in 2015, 2016 or 2017; the data collection year is noted beside the institutions name.

YOUR SELECT 6 INSTITUTIONS	
Eastern New Mexico University (2015)	Ouachita Baptist University (2017)
Penn State University, Harrisburg (2016)	University of Maine at Augusta (2016)
University of Mobile (2017)	University of Nebraska at Kearney (2016)

Carnegie Classification Institutions // The institutions in your Carnegie Class compose the second external benchmarking group. The Carnegie Classification of Institutions of Higher Education is a framework for classifying, or grouping, colleges and universities in the United States. The primary purpose of the framework is for educational research and analysis, where it is often important to identify groups of roughly comparable institutions. The classification includes all accredited, degree-granting colleges and universities in the United States that are represented in the National Center for Education Statistics Integrated Postsecondary Education Data System (IPEDS). For this assessment, Skyfactor used the 2015 Basic Carnegie Classifications to determine your institution's classification. All institutions outside the United States are combined into an "International" Carnegie Class. For a complete list of the institutions in your Carnegie Class, please refer to Skyfactor Benchworks' Online Reports.

YOUR CARNEGIE CLASSIFICATION
Master's Colleges & Universities: Small to Medium Programs
Generally includes institutions that awarded at least 50 to 199 master's degrees and fewer than 20 doctoral degrees during the update year (with occasional exceptions). Excludes Special Focus Institutions and Tribal Colleges.

There are 15 institutions in this comparative group.

All Institutions // The third external benchmark is the combination of all participating institutions. This provides a national norm or national standard. For a complete list of all participating institutions, please access Skyfactor Benchworks' Online Reports.

There are 87 institutions in this comparative group.

SURVEY RESPONSE RATES

Survey response rate (also known as completion rate or return rate) refers to the percentage of the surveyed population who responded to the survey. It is calculated by dividing the number of survey participants by the number of people in the sample. For example: if 1,000 surveys were attempted and 257 were completed, then the response rate would be 25.7%. Below are the response rates for your institution and your external benchmarking institutions. We have also included response rates by a few key categorical/demographic questions. Response rates for all other categorical/demographic questions can be found in Skyfactor Benchworks' Online Reports.

SURVEY RESPONSE RATE PERFORMANCE

	# ATTEMPTED	# RESP	RESPONSE RATE
Your Institution	46	42	91.3%
Select 6	740	413	55.8%
Carnegie Class	2,406	1,420	59%
All Institutions	26,483	14,628	55.2%

0 ----- RESPONSE RATE ----- 100%

GENDER

	# RESP	% TOTAL
Female	26	61.9%
Male	16	38.1%
Transgender	0	0%
Other	0	0%

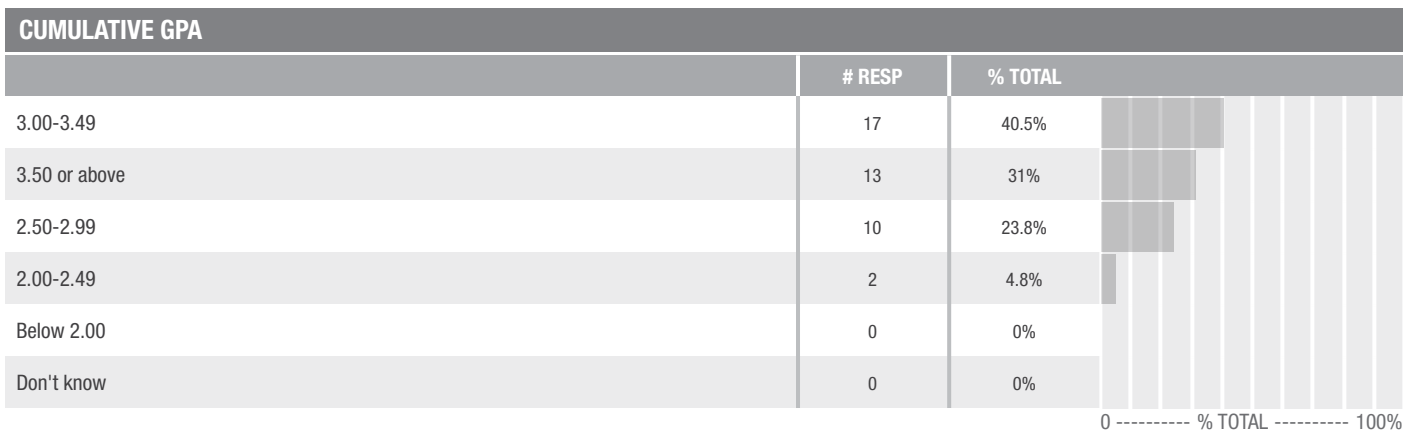

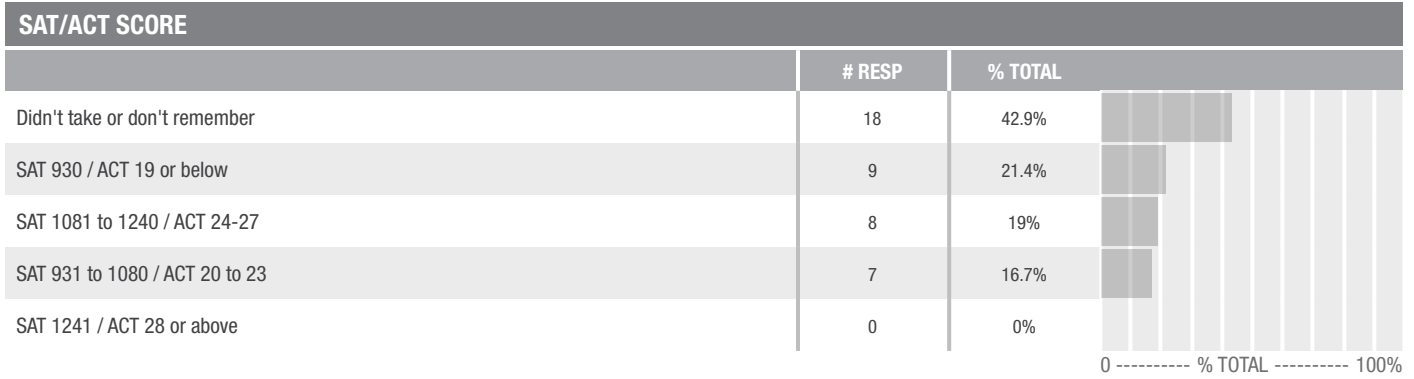

0 ----- % TOTAL ----- 100%

RACE/ETHNICITY (REPORTING ONLY)

	# RESP	% TOTAL
White	29	69%
Hispanic (regardless of race)	5	11.9%
Black or African American	4	9.5%
Two or more races	4	9.5%
American Indian/Alaska Native/First Nation	0	0%
Asian	0	0%
Native Hawaiian or other Pacific Islander	0	0%
Race and ethnicity unknown	0	0%

0 ----- % TOTAL ----- 100%

SURVEY RESPONSE RATES

This assessment allows for a high degree of customization to suit your institutional needs.

Unit-Levels // Your institution had the option of coding their surveys by Unit-Level, which provides analysis at this level of detail. From this analysis, you can immediately identify the areas that are top performing and those that are lower performing which drives the development of internal “best practices”. This analysis can be found within each factor section later in this report. A more detailed analysis can be found in Skyfactor Benchworks’ Online Reports.

Undergraduate Major	4 coded
----------------------------	----------------

Institution Specific Questions (ISQs) // Many institutions choose to take advantage of the opportunity to add “institution specific” questions to the survey. If your institution added questions, a detailed analysis of those questions can be found in Skyfactor Benchworks’ Online Reports.

MAJOR INDICATORS OF PERFORMANCE

To help your institution better understand its current performance and potential areas of improvement, Skyfactor reports results by Major Indicators of Performance (current performance of these indicators is listed below). This allows you to examine each indicator separately to identify areas in need of improvement. Subsequent reports in the Executive Summary provide detailed information for each indicator including recommendations for improvement, external benchmarking, and longitudinal trends. From the analysis, you may identify one or more factors in need of improvement. For more detailed information on that factor(s), please reference the appropriate section (tabs are labeled by factor numbers). In addition, please reference Skyfactor Benchworks' Online Reports which provides more detailed reporting.

Satisfaction // This indicator is a collection of factors that measures satisfaction on areas such as services, programming, or facilities. The dependent variable, within this indicator, is Overall Satisfaction. It acts as a proxy for the indicator and is composed of questions such as "To what degree did the experience fulfill your expectations?" It is important to understand the factors that drive satisfaction because a positive environment can improve student learning.

INDICATOR PERFORMANCE							
	SELECT 6	CARNEGIE CLASS	ALL INST.	N	MEAN	STD DEV	PERFORMANCE
Factor 19 // Overall Satisfaction	▼	▼	▼	41	4.88	1.53	64.7% 

0 ----- PERFORMANCE ----- 100%

Learning // This indicator is a collection of factors that measures student learning outcomes. The dependent variable, within this indicator, is Overall Learning. It acts as a proxy for the indicator and is composed of questions such as "To what degree has the program enhanced your learning experience?" It is important to understand the factors that drive learning in order to improve the college experience.

INDICATOR PERFORMANCE							
	SELECT 6	CARNEGIE CLASS	ALL INST.	N	MEAN	STD DEV	PERFORMANCE
Factor 20 // Overall Learning	=	=	=	41	5.48	1.25	74.7% 

0 ----- PERFORMANCE ----- 100%

Overall // This indicator, a combination of Satisfaction and Learning, provides a measure of the overall experience of the participant. The dependent variable, Overall Program Effectiveness, acts as the proxy for the indicator and is composed of questions from the dependent variables in Satisfaction and Learning. Ultimately, the college experience is a balance between customer satisfaction and student learning, thus understanding the predictors of Overall Program Effectiveness allows allocation of resources to the area(s) that will most benefit the student.

INDICATOR PERFORMANCE

LONGITUDINAL TRENDS

In this series of reports, you will find a summary of the indicator, Satisfaction. This summary includes current performance, external benchmarking, recommendations for improvement, and longitudinal trends. Together these analyses create a picture of your institution's performance and provide guidance for future improvement efforts. If you need to better understand the behavior of a factor, please reference its section (tabs are labeled by factor numbers). Also, please reference Skyfactor Benchworks' Online Reports for additional reporting.

Summary // The analyses below allow you to monitor the overall performance of the indicator, Satisfaction. Included are the current performance of the indicator's dependent variable, Overall Satisfaction, your institutional strength and weakness (the highest and lowest performance factor within this indicator), peer comparison (the factors where your institution performs best and worst against your Select 6), and the longitudinal trend of Overall Satisfaction. In subsequent indicator reports, we provide in-depth information in each of these areas.

SUMMARY

CURRENT PERFORMANCE

EXTERNAL BENCHMARKING

RECOMMENDATIONS

LONGITUDINAL TRENDS

There are many pieces of analysis that, when combined, create a comprehensive picture of your institution's performance. The first analysis to examine is the current performance. This information, coupled with understanding of individual population perceptions, external benchmarks, longitudinal trends, recommendations for improvement, and other institutional information or assessment is invaluable to constructing an effective Action Plan for improvement.

Current Performance // Aggregate

Below is your institution's current performance for Overall Satisfaction. This factor would be difficult to improve directly, but improving its predictors should result in its improvement. Be sure to review the Recommendations section, within the indicator, before creating your improvement plan.

INDICATOR PERFORMANCE

	N	MEAN	STD DEV	PERFORMANCE
Factor 19 // Overall Satisfaction	41	4.88	1.53	64.7% 

0 ----- PERFORMANCE ----- 100%

Below is the current performance of the factors associated with the Satisfaction indicator. Please review all of the information in this section before creating your program's Action Plan to improve Overall Satisfaction. It is natural to want to improve the lowest performing factors, but be careful! Improving the lowest performing factor may not improve Overall Satisfaction if it is not a predictor. Finish reviewing all analysis before developing your improvement plan.

INDICATOR FACTORS BY PERFORMANCE

	N	MEAN	STD DEV	PERFORMANCE
Factor 6 // Facilities	40	5.46	1.16	74.3% 
Factor 5 // Advisor	42	5.42	1.49	73.7%

------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

The second piece of the analysis picture is External Benchmarking. Throughout this report and in Skyfactor's Online Reporting, Benchworks compares your institutional data to the aggregate of your external benchmarking groups. If your Action Plan for institutional improvement includes improving Overall Satisfaction and if your program is performing below any of these external benchmarking groups, this information can be used to convince staff that higher performance is possible. If your institutional performance is higher than any of these groups, use this to celebrate!

Below is a comparison of your institutional results to your Select 6, Carnegie Class, and all participating institutions for the indicator's dependent variable, Overall Satisfaction, and the other factors associated with this indicator. A ▲ designates factors where your institution performs statistically higher than that external benchmarking group; a ▼ designates factors where your program is statistically lower in performance; and a = represents factors that are statistically equal with that external benchmarking group. The chart represents your institution's performance on each factor.

SUMMARY

CURRENT PERFORMANCE

EXTERNAL BENCHMARKING

RECOMMENDATIONS

LONGITUDINAL TRENDS

Arguably the most important piece of the analysis is Recommendations for Improvement. In order to improve Overall Satisfaction, it is necessary to know which factors have the greatest impact. Improving factors with high impact should lead to an improvement in Overall Satisfaction. The first chart shown below is the current performance for Overall Satisfaction. If this performance is below your desired level, identify the high impact factors (listed below) and focus your institution's improvement efforts on those factors.

INDICATOR PERFORMANCE

	N	MEAN	STD DEV	PERFORMANCE
Factor 19 // Overall Satisfaction	41	4.88	1.53	64.7% 

0 ----- PERFORMANCE ----- 100%

Skyfactor has grouped the Overall Satisfaction predictors into high and low impact as calculated from a multi-variant linear regression analysis. The strongest predictor is labeled as "1st", the second strongest is "2nd", and so forth. We label factors that do not contribute to the variance as "NP" (non-predictor). Skyfactor recommends your program focus its resources to improve the performance of your high impact factors while maintaining, but not expending resources to improve, low/no impact factor performance.

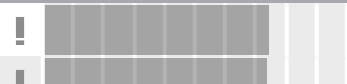

Note: Skyfactor Benchworks uses a significance value of $p < .05$ to calculate predictors. Based on the number of responses and/or the behavior of those responses, the significance value has been increased to $p < 0.08$

HIGH IMPACT FACTORS

-----------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------	---------------------------------------------	-----------------------------------------------------------------

The final piece of the analysis is Longitudinal Trends which supports continuous improvement. The term “continuous improvement” means a never-ending effort to improve programs and processes through several incremental improvements rather than one overwhelming innovation. The term “continuous assessment” means conducting assessment at regular intervals (Skyfactor recommends annual assessment); continuous assessment informs continuous improvement.

Longitudinal trends analysis, an artifact of continuous assessment, is the key to evaluating your institution’s continuous improvement efforts. Understanding trends is necessary to determine whether the actions conducted resulted in a successful outcome. If your institution’s current performance falls short of expectations, review the actions conducted on the top predictors and make adjustments.

Below is the longitudinal trend for the indicator and top predictors for the most recent iterations of this assessment. If your institution did not participate continuously during these iterations, Skyfactor extrapolated between successive iterations. A **▲** designates years where your institution performs statistically higher than the current year; a **▼** designates years where your program is statistically lower in performance; and a **≡** represents years that are statistically equal to the current year.

Current Performance // Aggregate

Below is your institution's current performance for Overall Program Effectiveness. This factor would be difficult to improve directly, but improving its predictors should result in its improvement. Be sure to review the Recommendations section, within the indicator, before creating your improvement plan.

INDICATOR PERFORMANCE				
	N	MEAN	STD DEV	PERFORMANCE
Factor 21 // Overall Program Effectiveness	42	5.12	1.25	68.7%

0 ----- PERFORMANCE ----- 100%

Below is the current performance of the factors associated with the Overall indicator. Please review all of the information in this section before creating your program's Action Plan to improve Overall Program Effectiveness. It is natural to want to improve the lowest performing factors, but be careful! Improving the lowest performing factor may not improve Overall Program Effectiveness if it is not a predictor. Finish reviewing all analysis before developing your improvement plan.

INDICATOR FACTORS BY PERFORMANCE				
	N	MEAN	STD DEV	PERFORMANCE
Factor 11 // Ethical and Legal Responsibilities	42	5.92	1.05	82.0%

The second piece of the analysis picture is External Benchmarking. Throughout this report and in Skyfactor's Online Reporting, Benchworks compares your institutional data to the aggregate of your external benchmarking groups. If your Action Plan for institutional improvement includes improving Overall Program Effectiveness and if your program is performing below any of these external benchmarking groups, this information can be used to convince staff that higher performance is possible. If your institutional performance is higher than any of these groups, use this to celebrate!

Below is a comparison of your institutional results to your Select 6, Carnegie Class, and all participating institutions for the indicator's dependent variable, Overall Program Effectiveness, and the other factors associated with this indicator. A **^** designates factors where your institution performs statistically higher than that external benchmarking group; a **v** designates factors where your program is statistically lower in performance; and a **=** represents factors that are statistically equal with that external benchmarking group. The chart represents your institution's performance on each factor.

Arguably the most important piece of the analysis is Recommendations for Improvement. In order to improve Overall Program Effectiveness, it is necessary to know which factors have the greatest impact. Improving factors with high impact should lead to an improvement in Overall Program Effectiveness. The first chart shown below is the current performance for Overall Program Effectiveness. If this performance is below your desired level, identify the high impact factors (listed below) and focus your institution's improvement efforts on those factors.

INDICATOR PERFORMANCE						
	N	MEAN	STD DEV	PERFORMANCE		
Factor 21 // Overall Program Effectiveness	42	5.12	1.25	68.7%	✘	

0 ----- PERFORMANCE ----- 100%

Skyfactor has grouped the Overall Program Effectiveness predictors into high and low impact as calculated from a multi-variant linear regression analysis. The strongest predictor is labeled as "1st", the second strongest is "2nd", and so forth. We label factors that do not contribute to the variance as "NP" (non-predictor). Skyfactor recommends your program focus its resources to improve the performance of your high impact factors while maintaining, but not expending resources to improve, low/no impact factor performance.

The final piece of the analysis is Longitudinal Trends which supports continuous improvement. The term “continuous improvement” means a never-ending effort to improve programs and processes through several incremental improvements rather than one overwhelming innovation. The term “continuous assessment” means conducting assessment at regular intervals (Skyfactor recommends annual assessment); continuous assessment informs continuous improvement.

Longitudinal trends analysis, an artifact of continuous assessment, is the key to evaluating your institution’s continuous improvement efforts. Understanding trends is necessary to determine whether the actions conducted resulted in a successful outcome. If your institution’s current performance falls short of expectations, review the actions conducted on the top predictors and make adjustments.

Below is the longitudinal trend for the indicator and top predictors for the most recent iterations of this assessment. If your institution did not participate continuously during these iterations, Skyfactor extrapolated between successive iterations. A ▲ designates years where your institution performs statistically higher than the current year; a ▼ designates years where your program is statistically lower in performance; and a = represents years that are statistically equal to the current year.

FACTOR 1 // Satisfaction: Quality of Instruction

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

Factors, a composite of scaled questions that explain a larger concept, are utilized in Skyfactor Benchworks' reporting to reduce complexity and strengthen the analysis. Skyfactor provides an in-depth analysis of the factor, Quality of Instruction, in this section of reports.

You are likely referencing this section to better understand this factor due to: 1) this factor is a high predictor; 2) this factor is performing below a desired level; 3) this factor is of special interest to your institution; or 4) this factor is an indicator. Through this analysis (i.e., current performance, external benchmark comparisons, and longitudinal trends), a thorough picture of the factor should emerge, however additional information can be found in Skyfactor Benchworks' Online Reports.

If improving this factor is a goal for your institution, actions should be targeted toward the factor's scaled questions (see list below) which are more tangible and more directly actionable. Analysis for these scaled questions is provided in this section allowing for sufficient understanding; additional information can be found in Skyfactor Benchworks' Online Reports.

FACTOR 1 // Satisfaction: Quality of Instruction

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

There are many pieces of analysis that, when combined, create a comprehensive picture of your institution's performance for this factor. The first analysis to examine is the current performance of the factor. This information, coupled with understanding of individual population perceptions, external benchmarks, longitudinal trends, individual scaled question performance, and other institutional information or assessment is invaluable to constructing an effective Action Plan for improvement.

Factor Performance // Aggregate

Below is your institution's current performance for Quality of Instruction and its scaled questions. While this factor might be difficult to improve directly, improving its scaled questions will likely be easier and will result in an improvement in the factor.

FACTOR 2 // Satisfaction: Aspects of Courses

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

Factors, a composite of scaled questions that explain a larger concept, are utilized in Skyfactor Benchworks' reporting to reduce complexity and strengthen the analysis. Skyfactor provides an in-depth analysis of the factor, Aspects of Courses, in this section of reports.

You are likely referencing this section to better understand this factor due to: 1) this factor is a high predictor; 2) this factor is performing below a desired level; 3) this factor is of special interest to your institution; or 4) this factor is an indicator. Through this analysis (i.e., current performance, external benchmark comparisons, and longitudinal trends), a thorough picture of the factor should emerge, however additional information can be found in Skyfactor Benchworks' Online Reports.

If improving this factor is a goal for your institution, actions should be targeted toward the factor's scaled questions (see list below) which are more tangible and more directly actionable. Analysis for these scaled questions is provided in this section allowing for sufficient understanding; additional information can be found in Skyfactor Benchworks' Online Reports.

FACTOR COMPOSITION

Aspects of Courses // To what degree did courses in the business program provide:

Q040 // Feedback on assignments (other than grades) received from instructors in major courses

Aspects of Courses // Regarding the faculty in the business program, to what degree did they:

Q041 // Get to know you

Q042 // Take an interest in your progress toward graduation

Q043 // Make themselves accessible outside of class

FACTOR 2 // Satisfaction: Aspects of Courses

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

There are many pieces of analysis that, when combined, create a comprehensive picture of your institution's performance for this factor. The first analysis to examine is the current performance of the factor. This information, coupled with understanding of individual population perceptions, external benchmarks, longitudinal trends, individual scaled question performance, and other institutional information or assessment is invaluable to constructing an effective Action Plan for improvement.

Factor Performance // Aggregate

Below is your institution's current performance for Aspects of Courses and its scaled questions. While this factor might be difficult to improve directly, improving its scaled questions will likely be easier and will result in an improvement in the factor.

FACTOR PERFORMANCE				
	N	MEAN	STD DEV	PERFORMANCE

FACTOR 2 // Aspects of Courses

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

In this report, Skyfactor Benchworks compares your institutional results to your Select 6, Carnegie Class, and all participating institutions for the factor and its scaled questions. A **▲** designates where your institution's mean is statistically higher than the comparative group; a **▼** designates where your institution's mean is statistically lower than the comparative group; and **=** designates where your institution's mean is statistically equal to the comparative group. A ranking of your institution and the external benchmarking groups is also provided. If your institution's performance is below that of an external benchmarking group, use this information to motivate staff that higher performance is possible; but if your institutional performance is higher, celebrate!

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A **▲** designates years where your institution performs statistically higher than the current year; a **▼** designates years where your program is statistically lower in performance; and a **≡** represents years that are statistically equal to the current year.

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

Factors, a composite of scaled questions that explain a larger concept, are utilized in Skyfactor Benchworks' reporting to reduce complexity and strengthen the analysis. Skyfactor provides an in-depth analysis of the factor, Co-Curricular Activities, in this section of reports.

You are likely referencing this section to better understand this factor due to: 1) this factor is a high predictor; 2) this factor is performing below a desired level; 3) this factor is of special interest to your institution; or 4) this factor is an indicator. Through this analysis (i.e., current performance, external benchmark comparisons, and longitudinal trends), a thorough picture of the factor should emerge, however additional information can be found in Skyfactor Benchworks' Online Reports.

If improving this factor is a goal for your institution, actions should be targeted toward the factor's scaled questions (see list below) which are more tangible and more directly actionable. Analysis for these scaled questions is provided in this section allowing for sufficient understanding; additional information can be found in Skyfactor Benchworks' Online Reports.

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

There are many pieces of analysis that, when combined, create a comprehensive picture of your institution's performance for this factor. The first analysis to examine is the current performance of the factor. This information, coupled with understanding of individual population perceptions, external benchmarks, longitudinal trends, individual scaled question performance, and other institutional information or assessment is invaluable to constructing an effective Action Plan for improvement.

Factor Performance // Aggregate

Below is your institution's current performance for Co-Curricular Activities and its scaled questions. While this factor might be difficult to improve directly, improving its scaled questions will likely be easier and will result in an improvement in the factor.

FACTOR PERFORMANCE

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

In this report, Skyfactor Benchworks compares your institutional results to your Select 6, Carnegie Class, and all participating institutions for the factor and its scaled questions. A **▲** designates where your institution's mean is statistically higher than the comparative group; a **▼** designates where your institution's mean is statistically lower than the comparative group; and **=** designates where your institution's mean is statistically equal to the comparative group. A ranking of your institution and the external benchmarking groups is also provided. If your institution's performance is below that of an external benchmarking group, use this information to motivate staff that higher performance is possible; but if your institutional performance is higher, celebrate!

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A \blacktriangle designates years where your institution performs statistically higher than the current year; a \blacktriangledown designates years where your program is statistically lower in performance; and a \equiv represents years that are statistically equal to the current year.

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

Factors, a composite of scaled questions that explain a larger concept, are utilized in Skyfactor Benchworks' reporting to reduce complexity and strengthen the analysis. Skyfactor provides an in-depth analysis of the factor, Facilities, in this section of reports.

You are likely referencing this section to better understand this factor due to: 1) this factor is a high predictor; 2) this factor is performing below a desired level; 3) this factor is of special interest to your institution; or 4) this factor is an indicator. Through this analysis (i.e., current performance, external benchmark comparisons, and longitudinal trends), a thorough picture of the factor should emerge, however additional information can be found in Skyfactor Benchworks' Online Reports.

If improving this factor is a goal for your institution, actions should be targeted toward the factor's scaled questions (see list below) which are more tangible and more directly actionable. Analysis for these scaled questions is provided in this section allowing for sufficient understanding; additional information can be found in Skyfactor Benchworks' Online Reports.

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

There are many pieces of analysis that, when combined, create a comprehensive picture of your institution's performance for this factor. The first analysis to examine is the current performance of the factor. This information, coupled with understanding of individual population perceptions, external benchmarks, longitudinal trends, individual scaled question performance, and other institutional information or assessment is invaluable to constructing an effective Action Plan for improvement.

Factor Performance // Aggregate

Below is your institution's current performance for Facilities and its scaled questions. While this factor might be difficult to improve directly, improving its scaled questions will likely be easier and will result in an improvement in the factor.

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

In this report, Skyfactor Benchworks compares your institutional results to your Select 6, Carnegie Class, and all participating institutions for the factor and its scaled questions. A **▲** designates where your institution's mean is statistically higher than the comparative group; a **▼** designates where your institution's mean is statistically lower than the comparative group; and **=** designates where your institution's mean is statistically equal to the comparative group. A ranking of your institution and the external benchmarking groups is also provided. If your institution's performance is below that of an external benchmarking group, use this information to motivate staff that higher performance is possible; but if your institutional performance is higher, celebrate!

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A \blacktriangle designates years where your institution performs statistically higher than the current year; a \blacktriangledown designates years where your program is statistically lower in performance; and a \equiv represents years that are statistically equal to the current year.

LONGITUDINAL TRENDS

Factors, a composite of scaled questions that explain a larger concept, are utilized in Skyfactor Benchworks' reporting to reduce complexity and strengthen the analysis. Skyfactor provides an in-depth analysis of the factor, Career Services, in this section of reports.

You are likely referencing this section to better understand this factor due to: 1) this factor is a high predictor; 2) this factor is performing below a desired level; 3) this factor is of special interest to your institution; or 4) this factor is an indicator. Through this analysis (i.e., current performance, external benchmark comparisons, and longitudinal trends), a thorough picture of the factor should emerge, however additional information can be found in Skyfactor Benchworks' Online Reports.

If improving this factor is a goal for your institution, actions should be targeted toward the factor's scaled questions (see list below) which are more tangible and more directly actionable. Analysis for these scaled questions is provided in this section allowing for sufficient understanding; additional information can be found in Skyfactor Benchworks' Online Reports.

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

There are many pieces of analysis that, when combined, create a comprehensive picture of your institution's performance for this factor. The first analysis to examine is the current performance of the factor. This information, coupled with understanding of individual population perceptions, external benchmarks, longitudinal trends, individual scaled question performance, and other institutional information or assessment is invaluable to constructing an effective Action Plan for improvement.

Factor Performance // Aggregate

Below is your institution's current performance for Career Services and its scaled questions. While this factor might be difficult to improve directly, improving its scaled questions will likely be easier and will result in an improvement in the factor.

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

In this report, Skyfactor Benchworks compares your institutional results to your Select 6, Carnegie Class, and all participating institutions for the factor and its scaled questions. A **▲** designates where your institution's mean is statistically higher than the comparative group; a **▼** designates where your institution's mean is statistically lower than the comparative group; and **=** designates where your institution's mean is statistically equal to the comparative group. A ranking of your institution and the external benchmarking groups is also provided. If your institution's performance is below that of an external benchmarking group, use this information to motivate staff that higher performance is possible; but if your institutional performance is higher, celebrate!

FACTOR 8 // Satisfaction: Career Services

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A **▲** designates years where your institution performs statistically higher than the current year; a **▼** designates years where your program is statistically lower in performance; and a **=** represents years that are statistically equal to the current year.

LONGITUDINAL TRENDS

In this report, Skyfactor Benchworks compares your institutional results to your Select 6, Carnegie Class, and all participating institutions for the factor and its scaled questions. A **▲** designates where your institution's mean is statistically higher than the comparative group; a **▼** designates where your institution's mean is statistically lower than the comparative group; and **=** designates where your institution's mean is statistically equal to the comparative group. A ranking of your institution and the external benchmarking groups is also provided. If your institution's performance is below that of an external benchmarking group, use this information to motivate staff that higher performance is possible; but if your institutional performance is higher, celebrate!

FACTOR 9 // Learning: Practical Competencies

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A **!** designates years where your institution performs statistically higher than the current year; a **✖** designates years where your program is statistically lower in performance; and a **=** represents years that are statistically equal to the current year.

LONGITUDINAL TREND

Factor Performance // Key Populations

Key categorical questions have been selected and are reported below. Answer options within each categorical question are divided into two groups in order to facilitate a statistical testing of means; a **^** designates the population which is statistically higher than the other population, a **v** designates the population that is statistically lower and an **=** indicates that the populations have statistically equal factor means. Relative population size (% Total) and Performance values for each group are plotted. To review this factor reported by all categorical questions and for all answer options, please refer to the Online Reporting.

If this factor is included in your Action Plan, consider the behavior of these populations to determine if targeted interventions are needed.

FACTOR 11 // Ethical and Legal Responsibilities

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

In this report, Skyfactor Benchworks compares your institutional results to your Select 6, Carnegie Class, and all participating institutions for the factor and its scaled questions. A **▲** designates where your institution's mean is statistically higher than the comparative group; a **▼** designates where your institution's mean is statistically lower than the comparative group; and **=** designates where your institution's mean is statistically equal to the comparative group. A ranking of your institution and the external benchmarking groups is also provided. If your institution's performance is below that of an external benchmarking group, use this information to motivate staff that higher performance is possible; but if your institutional performance is higher, celebrate!

FACTOR 11 // Learning: Ethical and Legal Responsibilities

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A ▲ designates years where your institution performs statistically higher than the current year; a ▼ designates years where your program is statistically lower in performance; and a = represents years that are statistically equal to the current year.

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

Factors, a composite of scaled questions that explain a larger concept, are utilized in Skyfactor Benchworks' reporting to reduce complexity and strengthen the analysis. Skyfactor provides an in-depth analysis of the factor, Financial Information, in this section of reports.

You are likely referencing this section to better understand this factor due to: 1) this factor is a high predictor; 2) this factor is performing below a desired level; 3) this factor is of special interest to your institution; or 4) this factor is an indicator. Through this analysis (i.e., current performance, external benchmark comparisons, and longitudinal trends), a thorough picture of the factor should emerge, however additional information can be found in Skyfactor Benchworks' Online Reports.

If improving this factor is a goal for your institution, actions should be targeted toward the factor's scaled questions (see list below) which are more tangible and more directly actionable. Analysis for these scaled questions is provided in this section allowing for sufficient understanding; additional information can be found in Skyfactor Benchworks' Online Reports.

FACTOR 12 // Learning: Financial Information

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

There are many pieces of analysis that, when combined, create a comprehensive picture of your institution's performance for this factor. The first analysis to examine is the current performance of the factor. This information, coupled with understanding of individual population perceptions, external benchmarks, longitudinal trends, individual scaled question performance, and other institutional information or assessment is invaluable to constructing an effective Action Plan for improvement.

Factor Performance // Aggregate

Below is your institution's current performance for Financial Information and its scaled questions. While this factor might be difficult to improve directly, improving its scaled questions will likely be easier and will result in an improvement in the factor.

FACTOR 14 // Learning: Organizational Behaviors

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A ▲ designates years where your institution performs statistically higher than the current year; a ▼ designates years where your program is statistically lower in performance; and a = represents years that are statistically equal to the current year.

FACTOR 15 // Learning: Multicultural and Diversity

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A ▲ designates years where your institution performs statistically higher than the current year; a ▼ designates years where your program is statistically lower in performance; and a = represents years that are statistically equal to the current year.

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

Factors, a composite of scaled questions that explain a larger concept, are utilized in Skyfactor Benchworks' reporting to reduce complexity and strengthen the analysis. Skyfactor provides an in-depth analysis of the factor, Domestic and Global Economies, in this section of reports.

You are likely referencing this section to better understand this factor due to: 1) this factor is a high predictor; 2) this factor is performing below a desired level; 3) this factor is of special interest to your institution; or 4) this factor is an indicator. Through this analysis (i.e., current performance, external benchmark comparisons, and longitudinal trends), a thorough picture of the factor should emerge, however additional information can be found in Skyfactor Benchworks' Online Reports.

If improving this factor is a goal for your institution, actions should be targeted toward the factor's scaled questions (see list below) which are more tangible and more directly actionable. Analysis for these scaled questions is provided in this section allowing for sufficient understanding; additional information can be found in Skyfactor Benchworks' Online Reports.

Factor Performance // Key Populations

Key categorical questions have been selected and are reported below. Answer options within each categorical question are divided into two groups in order to facilitate a statistical testing of means; a **^** designates the population which is statistically higher than the other population, a **v** designates the population that is statistically lower and an **=** indicates that the populations have statistically equal factor means. Relative population size (% Total) and Performance values for each group are plotted. To review this factor reported by all categorical questions and for all answer options, please refer to the Online Reporting.

If this factor is included in your Action Plan, consider the behavior of these populations to determine if targeted interventions are needed.

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A **▲** designates years where your institution performs statistically higher than the current year; a **▼** designates years where your program is statistically lower in performance; and a **=** represents years that are statistically equal to the current year.

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

Factors, a composite of scaled questions that explain a larger concept, are utilized in Skyfactor Benchworks' reporting to reduce complexity and strengthen the analysis. Skyfactor provides an in-depth analysis of the factor, Supply Chain, in this section of reports.

You are likely referencing this section to better understand this factor due to: 1) this factor is a high predictor; 2) this factor is performing below a desired level; 3) this factor is of special interest to your institution; or 4) this factor is an indicator. Through this analysis (i.e., current performance, external benchmark comparisons, and longitudinal trends), a thorough picture of the factor should emerge, however additional information can be found in Skyfactor Benchworks' Online Reports.

If improving this factor is a goal for your institution, actions should be targeted toward the factor's scaled questions (see list below) which are more tangible and more directly actionable. Analysis for these scaled questions is provided in this section allowing for sufficient understanding; additional information can be found in Skyfactor Benchworks' Online Reports.

Factor Performance // Key Populations

Key categorical questions have been selected and are reported below. Answer options within each categorical question are divided into two groups in order to facilitate a statistical testing of means; a **^** designates the population which is statistically higher than the other population, a **v** designates the population that is statistically lower and an **=** indicates that the populations have statistically equal factor means. Relative population size (% Total) and Performance values for each group are plotted. To review this factor reported by all categorical questions and for all answer options, please refer to the Online Reporting.

If this factor is included in your Action Plan, consider the behavior of these populations to determine if targeted interventions are needed.

Factor Performance // Key Populations

Key categorical questions have been selected and are reported below. Answer options within each categorical question are divided into two groups in order to facilitate a statistical testing of means; a **^** designates the population which is statistically higher than the other population, a **v** designates the population that is statistically lower and an **=** indicates that the populations have statistically equal factor means. Relative population size (% Total) and Performance values for each group are plotted. To review this factor reported by all categorical questions and for all answer options, please refer to the Online Reporting.

If this factor is included in your Action Plan, consider the behavior of these populations to determine if targeted interventions are needed.

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

In this report, Skyfactor Benchworks compares your institutional results to your Select 6, Carnegie Class, and all participating institutions for the factor and its scaled questions. A **▲** designates where your institution's mean is statistically higher than the comparative group; a **▼** designates where your institution's mean is statistically lower than the comparative group; and **=** designates where your institution's mean is statistically equal to the comparative group. A ranking of your institution and the external benchmarking groups is also provided. If your institution's performance is below that of an external benchmarking group, use this information to motivate staff that higher performance is possible; but if your institutional performance is higher, celebrate!

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A **▲** designates years where your institution performs statistically higher than the current year; a **▼** designates years where your program is statistically lower in performance; and a **≡** represents years that are statistically equal to the current year.

Factor Performance // Undergraduate Major

In this report, the institutional mean and a breakdown by Undergraduate Major is provided. If this factor is included in your Action Plan, identify the populations reporting more positive experiences in order to examine if there are best practices that can be applied to populations reporting less positive experiences.

FACTOR 21 // Overall Program Effectiveness

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

In this report, Skyfactor Benchworks compares your institutional results to your Select 6, Carnegie Class, and all participating institutions for the factor and its scaled questions. A **▲** designates where your institution's mean is statistically higher than the comparative group; a **▼** designates where your institution's mean is statistically lower than the comparative group; and **=** designates where your institution's mean is statistically equal to the comparative group. A ranking of your institution and the external benchmarking groups is also provided. If your institution's performance is below that of an external benchmarking group, use this information to motivate staff that higher performance is possible; but if your institutional performance is higher, celebrate!

FACTOR 21 // Overall Program Effectiveness

FACTOR COMPOSITION

FACTOR PERFORMANCE

EXTERNAL BENCHMARKING

LONGITUDINAL TRENDS

The final analysis for the factor is its performance over time. Longitudinal trends support continuous improvement and are the key to evaluating the success of your institution's action plan for this factor. If your institution's current performance falls short of expectations, review the actions conducted and make adjustments.

If your institution participated in two or more iterations of this assessment, a longitudinal trend is plotted. If your institution did not participate continuously, Skyfactor extrapolated between successive iterations. A **↑** designates years where your institution performs statistically higher than the current year; a **↓** designates years where your program is statistically lower in performance; and a **=** represents years that are statistically equal to the current year.

Q109 // Online Environment // To what degree did this your online courses provide: Interaction between you and your instructor

A summary of Q109 is provided. Please visit Skyfactor's Online Reporting to understand how different populations perceive this question.

A comparison of your institution's results with your external benchmarking groups is shown below. In addition to current performance, Skyfactor reports the range of means across the external benchmarking groups and the rank of your institution within those groups.

EXTERNAL BENCHMARKING										
	N	MEAN	STD DEV	MEAN RANGE		RANK	STAT SIG	PERFORMANCE		
				MIN	MAX					
Your Institution	42	4.88	1.89	--	--	--	--	64.7%	✘	
Select 6	304	5.14	1.53	4.69	5.59	4/6	=	69.0%	✘	
Carnegie Class	344	5.01	1.59	4.87	5.59	4/6	=	66.8%	✘	
All Institutions	4,781	4.96	1.61	3.62	6.15	37/52	=	66.0%	✘	

0 ----- PERFORMANCE ----- 100%

Scaled questions have seven answer options ranging from "1" (least desired response) to "7" (most desired response). Below is the breakdown of your institution's results and the results of your external benchmarking groups.

ANSWER FREQUENCY									
	NOT AT ALL			MODERATELY			EXTREMELY		
	1 //	2 //	3 //	4 //	5 //	6 //	7 //		
Your Institution	2.4%	16.7%	9.5%	9.5%	9.5%	28.6%	23.8%		
Select 6	3.0%	4.3%	7.2%	14.8%	22.4%	28.6%	19.7%		
Carnegie Class	2.6%	7.5%	7.8%	17.9%	17.9%	26.4%	19.9%		
All Institutions	2.9%	6.3%	8.7%	19.1%	19.4%	23.9%	19.6%
