SECTION 10: GRADUATE COURSES

"SL" designates a course with a Service Learning component

DEPARTMENT OF AGRICULTURE
AGRICULTURAL COURSES (AGRI)
5103 Agricultural Economics of Development
This course provides students with the basic theory and application of community economics. Emphasis will be placed on assisting a community with economic development efforts, analysis of providing community services, and business development, assessment, and retail trends analysis in rural communities. Graduate students will perform individual research projects.

AMERICAN STUDIES PROGRAM~GRADUATE OFFICE
AMERICAN STUDIES COURSES (AMST)
5103 Introduction to American Studies
An introduction to the theories and methodologies employed in the field of American Studies. Students will use archival, ethnographic, visual, and printed texts to understand the ways in which qualitative research can be used to examine American society through an interdisciplinary approach. The course's primary focus will investigate the construction, maintenance, and transmission of cultural meaning.

5113 Interdisciplinary Research in American Studies
Applying principles they have learned in AMST 5103, students in this course will either write a master's thesis prospectus and two thesis chapters or will write a scholarly research article for Civitas: The Journal of Citizenship Studies (or another academic journal) by developing the interdisciplinary research skills needed in the academic field of American Studies. Pre: AMST 5103 or permission of instructor.

5153 Studies in American Political Culture
Students will explore the factors, conditions, and people who have contributed to the unique traditions and circumstances creating America's distinctive political culture, political institutions, and political life. Related to this, students will examine some of the major events, important personalities, and key documents and speeches given by various American leaders that have combined to create the American Political Experiment. Also, the course will examine the role played by key American authors and artists and how their respective works have served to guide and direct the development of American politics and its leaders throughout the years. Consistent with the interdisciplinary nature of the American Studies Program, this course will incorporate the the study of history, literature, economics, and political science in a holistic and integrated fashion. Students will explore important concepts relating to American Studies such as the Frederick Jackson Turner Thesis and American Exceptionalism.

5330 Thesis Writing
A research report. Problem, outline, and report will be directed by the student's graduate thesis committee.

5500 Internship
Participate in work activities at an approved museum, cultural organization, consulting firm, foundation, or company for elective credit. Approved by instructor. See Office of Graduate Studies for more information. Pre: AMST 5103.

DEPARTMENT OF COMMUNICATION
MASS COMMUNICATION COURSES (MCOM)
5033 Principles of Advertising
A study of various media of advertising in connection with the distribution of goods/services and research methods utilized by advertisers. Pre: MCOM 3043 or permission of instructor.

5102 Desktop Publishing
Practical study of computer software used in the production of print publications. Emphasis is also placed on the legal and ethical considerations of desktop publication. Students will produce a broad range of projects. Pre: MCOM 2123 & 2222 or permission of instructor.

5103 News Editing
Students will participate in the practice of editing copy, writing headlines, and making up the pages of the newspaper. Concepts and theories of the editorial process will be analyzed. Students will seek out and critique scholarly journal articles concerning news editing issues. Pre: MCOM 2113 and 6 hours of English or permission of instructor.

5113 Mass Communication Law & Ethics
A study of legal principles that affect the mass media and the ethical considerations of media practitioners. Ethical philosophies will be analyzed. Concepts and theories of media law will also be analyzed. Students will seek out and critique scholarly journal articles concerning media legal and ethical issues. Pre: MCOM 2023, 2113, & 2123 or permission of instructor.

5123 Advanced Strategic Communication
A continuation of the study of specific public relations problems and opportunities; creation of instruments for public relations purposes; use of professional journals and other appropriate resources to research and further understand public relations. Pre: MCOM 2023, 2113, & 2123 or permission of instructor.

5133 Interpersonal Communication
A study of the principles and theories of communication in dyadic interaction. Emphasis will be placed on increasing student awareness of verbal and nonverbal communication behaviors in one-on-one contexts and other interpersonal situations. Research and presentations are required for a deeper understanding of related content. Pre: SCOM 1113.

5213 Business & Professional Communication
A study of the specific communication principles and methods for application in business and professional settings. Students will seek out professional journals to analyze and will critique articles to further their understanding of
oral business communication. Emphasis will be placed on management styles, communication techniques, and organizational communication. Pre: SCOM 1113 or permission of instructor.

5222 Feature Writing
Planning, researching, and writing articles in feature story formats. Additionally, students will be required to critique published feature stories and submit articles to publications based on current industry standards. Pre: MCOM 2113 and six hours of English or permission of instructor.

5302 Media Promotion and Sales
Survey of sales and promotion functions within media industries. Promotion and sales management, techniques, planning, and ethical standards will be emphasized. Students will use scholarly journals to further their understanding of sales and promotions connected to media industries. Pre: MCOM 2023 & 2123 or permission of instructor.

5322 Media Convergence
The historical and modern perspective of media convergence will be studied. An emphasis on currently implemented techniques and future media convergence strategies will be addressed. Students will complete research projects related to course content. Pre: MCOM 2023, 2113, 2123, and 3113 or permission of instructor.

5422 Advanced Television Production
Techniques of television production. Operation of all studio and field equipment as well as serving in all capacities involved in the production of programs for training and for airing over the university's cable television facilities. Production of programs capable of airing in a professional market required. Pre: MCOM 3113 or permission of instructor.

5432 Introduction to Media Research
An introductory examination of a variety of qualitative and quantitative research techniques and their appropriateness for addressing particular issues in mass communication. Research proposals will be completed. Pre: MCOM 2123 and 3303 or permission of instructor.

5803 Broadcast Writing and Announcing
Writing and announcing for electronic media including news, sports, documentaries, interviews, commercial copy, and other types of scripts. Students will be required to research and assess contemporary broadcast issues. Pre: MCOM 2113 and six hours of English or permission of instructor.

SPEECH COMMUNICATION COURSES (SCOM)

5013 Oral Interpretation (SL)
A study of the principles and techniques involved in the oral interpretation of prose, poetry, and dramatic literature. Presentation of interpretation material, analysis of presentations, and research concerning oral interpretation in addition to other course assignments are required.

5043 Nonverbal Communication
Focuses on the nonverbal behaviors and relevant contextual cues associated with human communication such as physical behavior, distance, facial expression, eye contact, paralanguage, the physical environment, touch, and cultural variables. Communication properties and characteristics of cultural and social groups will be explored. Research and presentations are required for a deeper understanding of related content.

5113 Advanced Speech Communication
A study of communication elements with practical application in oral presentations. Emphasis will be placed on audience analysis, extemporaneous speaking, and persuasive speaking. Research topics will focus on areas related to speech communication. Pre: SCOM 1113 or permission of instructor.

5123 Argument and Advocacy
A study of theory, practice, and criticism of public advocacy. The course will provide a combination of theory and practice with a focus on persuasive speaking and issues. Accordingly, the course will include lectures designed to identify and elaborate on the theoretical precepts of public advocacy, the norms and assumptions that guide successful public arguments, and exercises designed to allow students to practice fundamental skills. Extensive research is required for a deeper understanding of related content and processes. Pre: SCOM 1113 (or similar introductory speech course with an emphasis on public speaking) and at least 18 additional undergraduate credit hours in Speech Communication and/or Mass Communication.

5133 Interpersonal Communication
A study of the principles and theories of communication in dyadic interaction. Emphasis will be placed on increasing student awareness of verbal and nonverbal communication behaviors in one-to-one contexts and other interpersonal situations. Research and presentations are required for a deeper understanding of related content.

5213 Business & Professional Communication
A study of the specific communication principles and methods for application in business and professional settings. Students will seek out professional journals to analyze and critique articles to further their understanding of oral business communication. Emphasis will be placed on management styles, communication techniques, and organizational communication. Pre: SCOM 1113 or permission of instructor.

5603 Language and Speech Development
A study of the developmental processes in the acquisition of speech and language, factors which influence this development, methods of measuring speech and language skills, and theoretical models of communication development. Professional journals will be used to expand knowledge of course content.

5613 Small Group Communication
A study of small group dynamics designed to develop leadership skills and to facilitate decision-making in various group settings. Use of professional journals to research topics of small group communication and to further understanding of course content.

5733 Communication Disorders
A survey of speech, language, and hearing disorders; their identification and treatment; and the roles of various professionals in the total habilitation/rehabilitation process. Use of case studies to apply course information. Use of professional journals to expand knowledge of communication disorders.
DEPARTMENT OF ENGLISH, FOREIGN LANGUAGE, & HUMANITIES

ENGLISH COURSES (ENGL) ~ NOTE: Student applications indicating an emphasis in English will be referred to the department for approval.

5103 Shakespeare
A thematic survey of six of Shakespeare's plays, with emphasis on socio-historical contexts and afterlives. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5123 Renaissance Drama
According to the undergraduate catalog, English Drama is "a survey of English drama, exclusive of Shakespeare, from its earliest forms to the Restoration." This course will narrow its focus to non-Shakespearean Elizabethan and Jacobean drama. The period between the attack of the Spanish Armada and the closing of the public theaters in 1642 saw the development and refinement of a variety of dramatic forms; it was a period of such intense artistry--in terms of quality and quantity--that it is often considered to be a golden age or the birthplace of modern drama. Together, we will consider the following plays from this period: The Spanish Tragedy, The Jew of Malta, The Shoemaker's Holiday, Bartholomew Fair, The Roaring Girls, and The Duchess of Malfi. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5163 Literary Criticism
An introduction to contemporary literary theory in application to a variety of written and visual texts. Approaches may include new criticism, deconstruction, new historicism, psychological criticism, gender criticism, reader-response criticism, and reception criticism. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5173 English Usage
An advanced study of grammar to explore the systemic nature of the English language. Pre: ENGL 1113 or 1114 and 1213.

5183 History of the English Language
A study of the development of English from Proto-Indo-European roots to contemporary usage, with emphasis on socio-historical contexts that generate linguistic change. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5203 Contemporary Poetry
The study of 20th and 21st century poetry with special emphasis placed on reading and analyzing contemporary poets. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5213 Non-fiction Prose
A survey of contemporary non-fiction prose. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5263 20th and 21st Century British Novel
An advanced investigation into the development of the modern novel in English literature from 1900 to the present, with an emphasis on major novelists of the period. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5273 20th and 21st Century American Novel
The development of the modern novel in America from 1900 to the present with emphasis on the major novelists of the period. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5283 Renaissance Literature
Reading and interpreting English poetry and prose of the sixteenth and seventeenth centuries. Selected works include such authors as Spenser, Wyatt, Surrey, Raleigh, Bacon, etc. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5293 Romantic Movement
Focuses on the Romantic movement in the late 18th Century through the end of Queen Victoria's reign. Will include readings in poetry, prose, fiction, and drama in relation to the historical, political, and cultural issues of the period. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5403 Restoration and Eighteenth Century English Literature
Selected works of major poetry and prose writers of the period such as Dryden, Pope, Swift, Johnson, etc. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5413 Popular Literature
A survey of major contributions to one genre of popular literature--science fiction, mystery, historical fiction, etc.--or film. May be repeated for credit when course content changes. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5433 Nineteenth Century American Novel
Traces the history of the development of the novel as genre in the United States. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5443 Introduction to Linguistics
A study of the structure of language through syntax, morphology, phonetics, and phonology with application to structural and transformational grammars. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5463 American Literature
Intensive study of works of two selected authors, such as Faulkner and Hemingway, Steinbeck and Wolfe, Poe and Hawthorne, etc. Offered with sufficient demand. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5503 Mythology
A comparative study of world mythology with historical and thematic overviews with emphasis given to creation, theistic, and heroic myths from various cultures. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5523 Advanced Composition: Writing Theory
Intensive study of composition focusing on the principles of logic and rhetoric and their application to the analysis and production of written argumentative discourse; includes discussion of rhetorical strategies (Toulmin Paradigm, enthymeme) and heuristics (such as tagmemics, the Pentad, cubing and questioning) in the production of persuasive, informative, and interpretive written discourse. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.

5603 British Novel
A study of the development of the novel in Great Britain in the 18th and 19th centuries. Pre: ENGL 1113 or 1114, 1213, and 2123 or permission of instructor.
5613 Creative Writing
Advanced examination of the genres of creative writing (particularly short fiction and poetry) with an emphasis on structure, characterization, and narrative voice and opportunities for student writing in these areas.

DEPARTMENT OF FINE ARTS
MUSIC COURSES (MUSI)

5013 Music Literature
A survey of the music literature in the area of the student's interest. Graduate level research and study are required.

5103 Survey Course in School Music Problems
Discussion and special attention to problems which arise in the teaching of music in grades one through twelve. Special emphasis will be given to contemporary procedures and materials.

5121 University Bands
Membership is open to graduate students with approval of the instructor. Depending upon the graduate student's area of focus, additional duties will be assigned involving the academic, administrative, and musical aspects of the University Band. These can include but are not limited to a major research project, rehearsing the band, conducting in performance, running sectionals, arranging music, and designing drill.

5122 Advanced Instrumentation
A survey of the four choirs of instruments and beginning orchestration. Arrangements will be made for various combinations of instruments.

5202 Advanced Theory
Approved subtitles will include serial technique, the avant garde, Schoenberg and his school, canon, and fugue. May be repeated with emphasis on additional study subjects.

5233 Music for Elementary Teachers
A study and practical application of solutions to problems involved in music education grades 1-6, with emphasis on the acquisition of skills necessary for successful teaching at any grade level. Pre: MUSI 4442 or equivalent.

5242 Advanced Analysis
Analysis of advanced techniques of form and composition with emphasis on contemporary music. Pre: MUSI 4013.

5252 Advanced Music Composition
A study of contemporary music composition techniques, including traditional techniques as well as synthesized sound and MIDI.

5262 The Enjoyment of Music
A survey of the contemporary musical scene, including radio, television, theater, and concert hall. Outstanding personalities, organizations, and centers of musical activity will be studied. This course is designed primarily as general education for graduate students.

5302 Music Composition I
The fundamentals of music composition including solo, duet, trio, quartet, and small ensemble composition. One major composition (choral or instrumental) is required.

5312 Music Composition II
Continuation of 5302/Music Composition I. One major composition (choral or instrumental) is required.

5322 Advanced Instrumental Conducting
A survey and analysis of materials and literature for conducting instrumental ensembles. Pre: MUSI 3112.

5332 Advanced Choral Conducting
A survey and analysis of materials and literature for conducting choral ensembles. Pre: MUSI 3202.

5343 Choral Materials
A study of material and techniques used in the organization, training, and conducting of choral ensembles in the secondary school.

5402 Musical Styles
A study and analysis of stylistic features of music of the various periods of music history.

5412 Music of the Renaissance Era
A survey of the polyphonic music of the 16th century and the development of the styles and forms of representative composers.

5422 Music of the Baroque Era
A survey of the music from 1600 to 1750 and of the development of the styles and forms of representative composers.

5432 Music of the Classic Era
A survey of the music of the Rococo period to 1827 and of the development of the styles and forms of representative composers.

5442 Music of the Romantic Era
A survey of the music of the nineteenth century, including the development of the art song, opera, piano forms, and other instrumental music.

5452 Music of the 20th Century
A survey of the late nineteenth century music styles breaking away from the traditional tonal system to the new compositional techniques of twentieth century music. Includes representative music literature from Debussy to the present.

5503 Teaching Music Literature and Theory
A study of the techniques, procedures, and materials for teaching music literature and theory, including an analysis of contemporary texts.

5513 Music Supervision and Administration in the Public Schools
Preparation for the position of music supervisor. This course deals with all aspects of music supervision and administration, including budgets, schedules, faculty evaluation, instruction and curriculum improvement, and public relations.

5523 Music Research Techniques
A survey of bibliographical material, library resources, and research techniques necessary for graduate music study. Pre- requisite before writing thesis.
5530 Graduate Recital
Satisfactory completion of public recital in major performing discipline. Required of all music majors. Pre: Graduate standing, successful pre-recital hearing, and permission of applied instructor.

5531 Graduate Instruction in Brass Instruments
To learn educational techniques necessary to teach and perform on the trumpet, horn, trombone, euphonium, and tuba. Graduate students will assist in the instruction of MUSI 1531/Undergraduate Brass Methods and MUSI 3531/Advanced Undergraduate Brass Methods. They will delve deeply into both traditional and alternative means of teaching and have additional research projects in topics that can include the history of woodwind instruments or teaching techniques. In lieu of a paper, a recital on a secondary instrument is a possibility, depending upon the student's career aspirations and interests.

5541 Graduate Instruction in Percussion Instruments
To learn the educational techniques necessary to teach and perform on snare drum, timpani, keyboard percussion, drum set, and percussion auxiliary, graduate students will assist in the instruction of undergraduate Percussion Methods courses, will delve deeply into both traditional and alternative means of teaching, and will have additional research projects in topics that may include the history of percussion instruments or additional teaching techniques.

5543 Tests and Measurements in Music
A survey of the various types of tests available for evaluation of musical achievement.

5553 Teaching Orff and Kodaly in Public Schools
A study of the techniques, materials, and procedures of the Orff and Kodaly methods for teaching music in the public schools.

5561 Instruction in Woodwind Instruments
This class will learn the educational techniques necessary to teach woodwind instruments. They will also gain the technical ability to be a proficient performer on the flute, oboe, clarinet, bassoon, and saxophone.

5602 Marching Band Techniques
A study of various styles of marching and the techniques of parades and football shows. The course includes an examination and comparison of the various methods of charting.

5611 Accompanying
Development of piano skills in accompanying solos and ensembles. Emphasis is placed on sight-reading, technical skills, and the ability to follow a conductor or soloist. A laboratory session will include accompanying vocal and/or instrumental solos and ensembles within the department. Permission of the instructor required. May be repeated for elective credit.

Private Instruction
Private instruction in voice and instruments at the graduate level. Pre: permission of instructor.

5600 Voice
5610 Piano
5620 Organ
5630 Oboe
5640 Cello
5650 Trumpet
5710 Saxophone
5720 Clarinet
5730 Bassoon
5740 Percussion
5750 Viola
5760 Bass Viol
5810 Baritone
5820 Cornet
5830 Flute
5840 Trombone
5850 Violin
5860 French Horn
5870 Applied Conducting
5890 Tuba

THEATRE COURSES (TCOM)

5423 Principles of Directing
Study of script analysis and the principles, methods, and techniques of directing. Student directs class assignments. Additional directing assignments required.

5443 Theatre Pedagogy
A student is required to teach concurrently a 16-week theatre course at the public school or college level.

5733 History of Musical Theatre
The study of musical theatre from its inception: the North American influence to the 21st century. Particular attention is given to selected musicals and their social and cultural contexts and to the dynamic interaction and changing relationship between performance, audience, and society.

5862 Children's Theatre (SL)
This course examines the basic historical counseling theories commonly utilized by counseling practitioners who work with adults through old age. Focus includes child, adolescent, and adult guidance techniques utilized by educators and counselors, including cognitive, behavioral, and social characteristics.

Study of the developmental, psychological, and sociological forces that shape the behavior of children, adolescents, and adults through old age. Focus includes child, adolescent, and adult guidance techniques utilized by educators and counselors, including cognitive, behavioral, and social characteristics.

Identification, evaluation, and administration of the methods and techniques utilized to assess human behavior, focusing on measures of personality. Measurements, statistics, tests, and research methodologies are related to analysis of human behavior.

Identification, evaluation, and administration of individual and group tests used for measuring achievement and cognitive abilities in counseling and/or teaching situations. Psychometric properties of testing are also covered. Pre: PSYC 5173 (except Education students).

This course is designed to provide an overall understanding of the comprehensive process to design athletic facilities as well as the proper management procedures to operate athletic and recreational facilities effectively. Students will be exposed to a variety of athletic and sport facility design and operational conceptions that will provide a basic understanding for future general use in their roles as administrators and teachers.

In this capstone practicum, candidates will apply their knowledge, skills, and dispositions regarding the importance of preparing a presentation for professional personnel. The internship provides significant opportunities for candidates to synthesize and apply their knowledge and to practice the skills identified in previous classes including, but not limited to, supervision, finance, marketing, legal implications, and facility management. The candidate will experience substantial, sustained, standards-based work in real settings, planned and guided cooperatively by the university and school personnel.

This course is designed to provide a comprehensive educational background in athletic administration for the purpose of effectively preparing students to serve as athletic administrators in collegiate, public school, or sports-related businesses. Students will be provided detailed information concerning an assortment of athletic and sport-specific topics within the administrative realm that will establish a knowledge base in their preparation of becoming future athletic and sports administrators.

This course provides a study of human sexuality from biological, psychological, and social perspectives.

Identification, evaluation, and description of the theories of counseling as they relate to substance abuse counseling. The 12-step method is also introduced as a self-help treatment modality. Methods and procedures of the counseling process, an introduction to the dynamics of the counselor-counselee relationship, techniques related to substance abuse counseling, and the use of assessment tools in substance abuse counseling are also presented.

This course is designed to provide a comprehensive intramural program through research by identifying different components of said programs to include in their own research. Graduate candidates will develop a comprehensive intramural program thorough research by identifying different components of said programs to include in their own research.

The physiological changes and associated phenomena that occur within the body as a result of exercise.
families. It examines the qualities and characteristics of effective counselors as well as ethical guidelines for the effective practice of psychotherapy with families.

5213 Advanced Abnormal Psychology
A study of human behavior as it relates to maturation, self-concept, personality traits, psychological needs, and pathological conditions.

5253 Intervention Strategies for Counselors
This is a course designed to help school counselors prepare for crisis situations. Knowledge of the expected kinds of emergencies that can arise as well as strategies for dealing with crisis situations is covered.

5283 Addiction Studies - Advanced
An intensive course in the application of knowledge of academics, theories, and skills to the actual practice of counseling in addictions. In this course, students are introduced to different facilities, boards, knowledge, and practical-based seminars. Students are encouraged to develop marketing strategies for their practice as well as to develop a supportive network from which to seek the advice of other professionals.

5293 Advanced Psychopharmacology
This course is designed to provide students with a working knowledge of various psychotropic drug categories including legal/illegal drugs and alcohol. Students will learn concepts related to drug effects, mechanisms and sites of function, drug interactions, addiction, tolerance, and abuse.

5313 Advanced DSM
Evaluation of psychopathology through utilization of the current Diagnostic and Statistical Manual. Analyze new diagnostic categories, differential diagnoses, and dimensional approaches when evaluating clinical diagnoses and creating treatment plans in a clinical setting.

5330 Thesis Writing
A research report. Problem, outline, and report will be directed by the student's graduate thesis committee.

5353 Addiction and the Family--Theory
Examination of family counseling theories related to the ways in which drug and alcohol dependency affects family functioning and dynamics.

5363 Addictions and Family Counseling
The study and application of counseling methods and techniques used to improve family functioning when one or more family members are drug or alcohol dependent. Pre: PSYC 5353.

5453 Advanced Cognitive Psychology
An introduction to human cognition, learning, language, and problem solving with an emphasis on memory and current models of information processing.

5500 Practicum (MCP) (SL)
Supervised experience pertaining to individual graduate programs. Pre: PSYC 5803, 5863, 5893.

5513 Advanced Adolescent Guidance
The goal of this course is to enhance the communication skills and change strategies to help adolescents with their unique problems. A theoretical understanding of adolescent behavior is included. The influence of parents and the art of parenting is examined.

5613 Advanced Child Guidance
The goal of this course is to enhance the communication skills and change strategies to help children with their unique problems. A theoretical understanding of children's behavior is included. The influence of parents and the art of parenting is examined.

5623 Advanced Personality
An intensive introduction to the study of current personality theories; analysis of the organized dynamic behavior of the individual.

5623 Advanced Statistics
An introduction to hypothesis testing in psychology. The course provides knowledge concerning applied statistical methods including how to compute basic statistics and interpretation of statistical results. It fulfills requirements in research methods, experimentation, and analysis of data.

5803 Counseling Strategies and Techniques
Methods and procedures descriptive of the counseling process with emphasis on the dynamics of the counselor-counselee relationship, interviewing techniques, and the use of test results in counseling. Pre: PSYC 5863.

5812 Group Counseling
Group counseling processes are examined from various theoretical approaches. A critical examination is made from the practitioner's concerns and the selection of an appropriate group method. Pre: PSYC 5863 or concurrent enrollment.

5813 Group Counseling
Group counseling processes are examined from various theoretical approaches. A critical examination is made from the practitioner's concerns and the selection of an appropriate group method. Pre: PSYC 5872 or concurrent enrollment.

5823 Multicultural Counseling
An introduction to the philosophies and principles necessary for counseling individuals from diverse social, ethnic, and cultural backgrounds. A major focus will be on barriers to effective cross-cultural counseling and ways to overcome those barriers. Characteristics of different sociocultural and ethnic groups that could affect the counseling process will be included. Pre: PSYC 5872 or concurrent enrollment.

5832 Career Education
A comprehensive study of the world of work; of the many kinds and sources of occupational and educational information, and how this information may be located, evaluated, and utilized as part of a comprehensive guidance program.

5833 Career Education
A comprehensive study of the world of work; of the many kinds and sources of occupational and educational information, and how this information may be located, evaluated, and utilized as part of a comprehensive guidance program.

5863 Individual Counseling
Theories of counseling and their utilization in practice; the nature of problems of greatest concern to clients; and the use
of various tools and techniques of counseling which may be utilized by counselors.

5872 Individual Counseling
Theories of counseling and their utilization in practice; the nature of problems of greatest concern to clients; and the use of various tools and techniques of counseling which may be utilized by counselors.

5893 Supervised Experience in Counseling
The development of skills in the application of theories and techniques of counseling including the utilization of interviewing procedures, appraisal instruments, educational and occupational information, and related activities and materials. Pre: PSYC 5803 and 5863.

5914 Capstone Project
Students will work on a capstone project in Introduction to Research and will evolve it into one of two outcomes: a formal presentation of the research project at a professional conference or Ranger Research Day, or a submission of the research manuscript for publication. In addition, students will defend their research to their graduate advisory committee.

5937 Thesis in General Psychology
The thesis will be written by the student with the support of the student's graduate advisory committee. The outcome is the submission of the thesis for publication and a defense of the thesis to the student's graduate advisory committee.

DEPARTMENT OF SOCIAL SCIENCES
CRIMINAL JUSTICE COURSES (CJUS)

5263 Public Service Leadership
This course provides an overview of the characteristics and styles of leadership as they are applied to the public sector. Principles of strategic planning, programmatic development and implementation within the public realm are reviewed as they relate to consensus building and collaborative leadership in federal, state, and local agencies.

HISTORY COURSES (HIST)

5013 World History Since 1945
An examination of world developments from the end of World War II to the present. This course focuses on the establishment and decline of a bi-polar world and the corresponding adaptations of various nations and regions.

5023 The Middle Ages: 500-1500
A study of Europe from the fall of Rome to the High Renaissance and the dawn of the Early Modern Era, emphasizing the formation of western society during the Dark Ages and the great achievements of the High Middle Ages.

5113 U.S. Diplomatic History
An examination of the U.S. emergence as a world power, emphasizing its empire development, involvement in two world wars, leadership in the cold war, and current relations with major countries.

5123 Oklahoma History and Government
A survey of the state's history and government from pre-history to the present with an emphasis upon developments affecting native Americans and the evolution of modern Oklahoma.

5133 Ancient Greece
Detailed study of the social, political, and intellectual life of the Greeks; influences of Greek philosophy and culture upon modern civilization.

5143 Rome
Origin and expansion of Rome, its political and cultural life, including rise of Christianity, technical achievements, government and law, and the enduring influence of Rome on the civilization of western Europe.

5203 The American West
An examination of the westward movement in the U.S., the significance of the frontier in the nation's history, and the role of the region in building the nation.

5213 American Colonial Period
Study of American history from discovery to 1783, with an emphasis on the political, cultural, and economic experiences that produced the United States.

5223 The United States: 1783-1840
An historical analysis of the founding of the U.S. and the subsequent development of constitutional government, the contributions of major leaders, and the emergence of new political and sectional tensions.

5233 The United States: 1841-1877
An examination of U.S. history from the end of the Jacksonian era through Reconstruction. The course focuses on reform movements and westward expansion in the 1840s and 1850s, the Civil War, and Reconstruction policies.

5293 Europe: 1815-1945
This course provides a comparative analysis of the political, cultural, social, and economic transformations as they developed in Europe, starting with an assessment of Napoleon's historical legacy and ending at the conclusion of World War II.

5313 The United States: 1933 to Present
An examination of U.S. history from the New Deal to the present. The course focuses on the expanding role of government in the economy, domestic life and world affairs, the Civil Rights movement, the Watergate scandal, and broad changes in American society.

5323 England to 1688
Political, economic, constitutional, and cultural development of the British Isles from the earliest times to the Glorious Revolution.

5330 Thesis
A research report. Problem, outline, and report will be directed by the graduate thesis committee. Must be approved by a student's graduate advisory committee in order to be eligible for a graduate plan of study.

5333 England Since 1688
Political, economic, constitutional, and cultural development of the British Isles from the Glorious Revolution to present.
5402 Historic Preservation (SL)  
Shaped by a concern for the needs of both history students and interested community members, this class will overview the Historic Preservation Movement in the United States, introduce government policies and regulations, focus on how to identify the style of historic properties, and provide participants with the opportunity to engage in a service-learning activity. Students will move from an exploration of what this movement is and how it developed to hands-on investigations of American architectural styles and other selected projects. This class will also make connections between Historic Preservation and Public History.

5412 Museum Studies  
In an effort to introduce both history students and interested community members to the world of museums and the professions associated with them, this class will overview the history of museums, explore museum departments and activities, and focus on the roles and obligations of museums. Students will move from an exploration of what these institutions are and how they developed to hands-on investigation of collection documentation, preservation, museum ethics, and educational interpretation. This class will also make connections between Museums and Public History.

5413 Renaissance and Reformation  
A survey of the economic, political, social, religious, and cultural developments in Western Europe from 1270 to 1650.

5422 Public History  
Public History is about applying the knowledge, skills, and methods of traditional history outside the world of academia. Public Historians write the histories of communities or corporations; they operate state historical societies; they help to develop historic preservation projects; they collect oral interviews; they create museum exhibits; they prepare genealogies; they participate in policy planning; and much more. Created for history students as well as interested community members, this course will investigate Public History, moving from an exploration of the definition of this discipline to concrete examples of the issues and opportunities involved within this important field of historical work.

5433 Historical Methods  
An examination of historical methods and standards for research and writing, culminating in the writing of an historical paper. Recommended for history majors.

5523 Russian History to 1917  
An examination of the gradual and often tragic development of the Russian state, ending with the 1917 revolution that overthrew the tsarist regime.

5563 History of Modern Germany Since 1871  
This course examines the creation of the modern German state in 1871 and its various historical transformations in the heart of Europe. It also assesses critical problems in modern German history with an emphasis on unification and the age of Bismarck, the First World War, cultural and intellectual ferment, Hitler and the Nazi period, and postwar East and West Germany.

5583 History of Middle and Far East Asia  
This course examines the history of Asia, including the Middle East, India, and Far East, from the early Middle Ages to the modern era. It seeks to comprehend the complex array of political, social, economic, and religious problems of a vast region growing in global significance.

5603 U. S. Economic History  
Historical perspectives on the growth of economic sectors of agriculture, industry, commerce, and finance. Analysis of the interaction of the economic and government sectors in America.

5613 Native American History  
An examination of the various American Indian tribes, emphasizing their cultural characteristics, resistance to domination, contributions to American society, and their place in the contemporary U.S.

5623 The United States: 1877-1932  
An examination of U.S. history from the Gilded Age through the Great Depression. Emphasis is placed upon the scope and consequences of economic and population growth, Progressive Era reforms, increasing involvement in world affairs, social upheaval of the 1920s, and the economic collapse that ended that decade.

5633 History of Modern Russia  
The course examines the creation of the Soviet state. It also assesses the impact of the various dictators who ruled the nation from 1917 until 1991. Post-communist Russia is also studied by looking at the strategies of the Russian government as it endeavors to establish and maintain political and economic stability.

5663 Survey of Latin American History  
This course presents an overview of the history of Latin America from the Pre-Columbian civilizations to the present. Emphasis will be placed on understanding the development of diverse cultural, political, and economic institutions of the region.

5723 African American History  
An examination of the Black experience in the U.S. since 1619, emphasizing slavery, emancipation, patterns of segregation and discrimination, the Civil Rights movement, Black contributions to American society, and current conditions.

GEOGRAPHY COURSE (GEOG)

5163 Political Geography  
Fundamentals of political geography; survey of geo-politics; study of the world's critical areas.

POLITICAL SCIENCE COURSES (POLS)

5113 Constitutional Studies  
This course will explore the connections between the U.S. Constitution and the citizens it serves. It will encourage students to assess critically the ways in which the U.S. Constitution plays a relevant role as to how government functions and impacts various things such as federalism, the courts, civil rights, etc. The course will also seek to explore the philosophy behind the U.S. Constitution and to consider the implications for public administrators.
5123 Advanced Political Theory
This course will consider the ideas and writings of important political theorists and their contributions to public administration. The types of theorists covered will include a broad range of writers from Plato to John Rawls. The ideas of these theorists will be examined and considered in light of how their ideas have impacted public administration.

5133 Comparative Government
This is a graduate course designed to offer students an introduction to the main concepts of comparative politics and wide coverage of major countries around the world. Specifically, this course compares and contrasts the countries of the United States, Great Britain, France, Germany, Japan, India (consolidated democracies) and Iran and China (authoritarian regimes). Included is an emphasis upon the historic formation of the state, the major institutions of governance and policymaking, the processes of representation and participation, and the major issues that confront each state.

5153 International Relations
This graduate course examines international relations, political and economic nationalism, minorities, imperialism, international organization, settlement of international disputes, and the preservation and promotion of peace.

5173 U. S. Foreign Policy
Examines the perspectives and practices of the U. S. government in regards to actions taken, rationales for those actions, and consequences ensuing from the actions, when dealing with foreign governments. Also considers issues of bureaucracy and persons charged with initiating those actions, including the consequences of foreign policy decisions during specific eras in U. S. history, such as the Cold War, the Vietnam War, and the post-9/11 War on Terror.

5213 Public Policy Studies
This course will ask students to consider the reasons why government chooses to act or not act on particular issues, problems, and situations. It will present various theories and concepts regarding the primary issues associated with public policy, such as problem definition, the ways in which policies are generated, as well as policy implementation and evaluation.

5223 Elements of Public Administration
Students in this course will consider the essential aspects and theories most central to public administration. A few of the topics to be covered include (but will not be limited to) organizational theory, budget and finance issues, and personnel management.

5253 Federal, State, and Local Relations
The study of government in the state and its subdivisions: includes municipal governments and municipal problems, administration and problems of organization, control, personnel, and finance in these areas. Will be taught from the reference point of the Federal Government and its policies and controls.

5263 Public Service Leadership
This course provides an overview of the characteristics and styles of leadership as they are applied to the public sector. Principles of strategic planning, programmatic development and implementation within the public realm are reviewed as they relate to consensus building and collaborative leadership in federal, state, and local agencies.

5303 The Federal Legislative Branch
This course will examine the rule of Congress as a major actor in the federal government. Special emphasis will be directed toward the functions of Congress as they relate to issues such as coercive federalism and laws that tend to impact state governments heavily and thus play a major role in terms of public administration.

5313 The Federal Executive Branch
This course will focus upon the executive authority and the role that it plays in terms of serving as the nation's leading branch of public administration. In this regard, it will examine the role of the president, the cabinet, the vice president, and other relevant actors in the executive branch.

SOCIOLOGY COURSES (SOC)
5113 Cultural Anthropology
This course provides an exploration and analysis of the concept of culture; development of culture from a global perspective; ethnographical and ethnological bases for cross-cultural comparisons; overview and discussion of cultural diffusion across cultures.

5123 Social Gerontology
An overview of the societal forces that shape the lives of older citizens of America. Included will be an examination of the classic theories of aging, the major factors associated with aging, programmatic planning for health, wellness, finances, living environments, and retirement for older citizens.

5133 Rural Sociology
This course provides an analysis of the issues and problems confronting rural communities and populations in the United States and the disparities which exist between urban and rural areas. At the graduate level, a special emphasis is placed on understanding federal and state grant programs’ impact on units of local government in the provision of social, economic, public safety, and health services in rural regions.

5153 Social Diversity
An examination of the effects of race, ethnicity, religion, and other factors on social relationships and opportunities. Presents theories about the reactions between diversity, social injustice, and oppression. Examines ethical issues in relation to social conflict and cooperation.

5203 Social Theory
An overview of social theories of representative social thinkers and systems as they relate to the development of formalized social thought and sociology.

5263 Public Service Leadership
This course provides an overview of the characteristics and styles of leadership as they are applied to the public sector.
Principles of strategic planning, programmatic development and implementation within the public realm are reviewed as they relate to consensus building and collaborative leadership in federal, state, and local agencies.

5303 Social Psychology
This course relates various social psychological theories to human development and social interaction within a social context. The relationship between the individual, groups, and society are reviewed and evaluated. Culturally significant normative behaviors are also reviewed.

**DIVISION OF EDUCATION**

**EDUCATION COURSES (EDUC)**

5010 Graduate Study Seminar
An introduction to graduate study, including policies and procedures of the Graduate Studies programs. The seminar will introduce Master of Education students to the Aurora Learning Community Association’s web-based assessment system. Pre: Admission to graduate study. Required during the first semester of graduate coursework.

5013 Introduction to Research
A systematic analysis of education and counseling problems, techniques of collection and interpretation of data, and the reporting of results. Requirements include the writing of one significant paper in the area of one’s area of specialization. A required core course for the M.Ed. degree, the MCP degree, and the MGP degree.

5023 Portfolio Development
All National Board assessments consist of two major parts: the portfolio entries and the assessment center exercises. Candidates are asked to put together the portfolio according to specifications developed by the National Board. The portfolio consists of several different entries, each of which asks for direct evidence of some aspect of the teacher’s work and an analytical reflective commentary on that evidence. Teachers are required to describe, analyze, explain, and reflect on their practice. In addition to completing the classroom-based entries, candidates document their work outside the classroom with families and the larger community and with colleagues and the larger profession. A good portfolio reflects the standards and provides evidence of a teacher’s level of accomplishment. This course is designed to orient students who are candidates for National Board Certification with the specifications of the portfolio and the NBPTS standards. See "COURSE RESTRICTIONS," Section 6.

5033 National Board Examination Preparation
All National Board assessments consist of two major parts: the portfolio entries and the assessment center exercises. The assessment center component of the process consists of assessment exercises that are focused on a candidate’s content knowledge. Candidates are responsible for content and pedagogical knowledge across the full age-range of a selected certificate area (and specialty area, if applicable). This course is designed to prepare students who are candidates for National Board Certification in the appropriate content and pedagogical knowledge for their area of specialty. See "COURSE RESTRICTIONS," Section 6.

5093 Curriculum and Instruction for Special Learners
Students will investigate the instructional needs and curricula essential to the education of the exceptional learner. Attention will also be directed toward instructional materials, objectives, and strategies appropriate for multicultural instructional settings. Pre: Permission of Associate Dean of the School of Education.

5103 Curriculum in Schools
The study of curriculum design and leadership. This course will cover the evaluation of comprehensive, curricular, and instructional school programs and will discuss the most effective and appropriate technologies to support teaching and learning. Pre: Permission of Associate Dean of the School of Education.

5113 Early Childhood Family and Community Relations
This course prepares early childhood professionals to establish relationships with families through sensitivity to differences due to cultural or ethnic background, handicaps, special talents, and cognitive style are given special consideration. A required core course for most M.Ed. degree options.

5123 Individual Intelligence Testing (Woodcock-Johnson)
Intensive practice in the administration and interpretation, including test write-ups, of the Woodcock-Johnson Intelligence Scale. The Slosson, Peabody, and other measures of intelligence will be examined.

5203 Educational Practices
A study of the major philosophies of education which have influenced education from historical times; a study of the development of public education; sociological problems of contemporary times, and the implications of the foregoing on curriculum development. Recommended practices for developing curriculum to meet current rules, regulations, laws, and policies. A required core course for most M.Ed. degree options.

5212 Psychology of Teaching
Teaching strategies are examined as they relate to the process of learning and the characteristics of the learner. Individual differences due to cultural or ethnic background, handicaps, special talents, and cognitive style are given special consideration. A required core course for most M.Ed. degree options.

5221 Advanced Educational Technology
This course provides proficiency at utilizing technology in the P-12 classroom arena. Focus is on curriculum integration with the latest technological devices to develop a variety of instructional and assessment strategies to encourage learners to develop a deeper understanding of content areas.

5222 Advanced Educational Psychology
This course is an analysis of the research-based theories of development and learning and their implications in the Pre-K-12 classrooms. Advanced application of the theoretical framework to pedagogical best practices is emphasized.

5223 Methods and Techniques of Individualizing Instruction
Strategies, techniques, and methods of structuring curriculum and instruction to accommodate learner needs. Students will develop skills in organizing programs for Individualized Educational Programs for all students.

5231 Advanced Assessment Design
Development and application within a classroom of various types of formal and informal assessments, i.e. rubrics, portfolios,
checklists, and observation in order to engage student growth, to monitor learner progress, and to guide teachers’ and learners’ decision making. The Oklahoma teacher evaluation process will also be explained.

5243 Remediation of Mathematical Disabilities

5263 Historical and Theoretical Perspectives of Special Education
This course will provide graduate students an opportunity to examine the basic concepts of individual diversity as well as the historical development of special education. The issue of disability will be studied within the various contexts in which the individual learner develops. The social systems perspective will include a review of the variations in beliefs, traditions, and values across cultures and will emphasize the subtle factors effecting the relationship involving child, family, school, and community in recognition of the development of the whole child; the changes which maltreatment, neglect, and abuse impose upon children and families will be an issue of study. Another focus of study will include the theoretical and philosophical basis which provide the underpinnings for current practices in special education. Current trends regarding student and parent rights, due process and legal issues, and issues in definition and identification procedures will also be investigated through a case studies approach.

5273 Language Literacy and Culture
This course will explore the social-cultural perspectives related to the role of language as it relates to literate behaviors, cognition, and action in learning contexts. Aspects of language use within various learning contexts and its relationship to literate processes will be explored. Emphasis will be placed upon the role of academic, technical, and everyday discourse in understanding the interrelationships among teaching, learning, knowledge, and culture.

5283 Literacy Assessment
Analysis of assessment instruments, primarily related to reading difficulties. Specific current reading assessments will be studied. Pre: Permission of Associate Dean of the School of Education.

5313 Children’s Literature
This course focuses on the importance of children’s literature in the curriculum through an extensive reading and evaluation of literary genres, authors, illustrators, critiques, awards, and literary elements appropriate for PK-grade 8 children. Application of literacy instruction and available resources to engage and motivate students.

5330 Thesis Writing
A research report. Problem, outline, and report will be directed by the student’s graduate thesis committee.

5352 Behavior Intervention Strategies
An analysis of behavior management through exploration of the concerns for school discipline by examining human behavior, needs, motives, and controls. Study of the ethics and the consequences of the use of different approaches of behavior management will be examined. Multicultural concerns as well as the needs of exceptional children will be included.

5373 Curriculum Development for Students with Mild/Moderate Disabilities
Graduate students will acquire the conceptual and technical tools to enable them to modify curriculum and instruction for learners with mild/moderate disabilities. There will be an emphasis on instructional and remedial methods, techniques, and curriculum materials. The emphases will be the development of motor, cognitive, academic, social, language, effective career, and functional life skills for individuals with mild/moderate disabilities, including mild/moderate learning disabilities, mild/moderate emotional/behavioral disorders, and mild/moderate mental retardation. The course will also cover life skill instruction relevant to independent, community, and personal living and employment. Ethnic and cultural perspectives influencing the relationship among families, schools, and communities as related to effective instruction for individuals with exceptional learning needs will be emphasized.

5383 Leadership in Special Education
This course is designed to assist the graduate student in acquiring an understanding of the roles and responsibilities of the learning specialist. Students will investigate the professional relationship of the learning specialist to other professionals. Students will explore the relationship of professionals in special education to persons at all levels (PK-12) with mild/moderate disabilities and their families. The course will emphasize leadership, professionalism, and ethical considerations regarding responsibilities in the areas of relationships, conferencing, record keeping, confidentiality, learning, and advocacy. Areas of study will also include the CEC Code of Ethics and Standards for Professional Practice.

5392 Clinical Procedures for Teaching Students with Severe/Profound Disabilities
Graduate students will learn the process for making decisions with general educators, learners, and their parents regarding the teaching of academics so that academic skills will contribute meaningfully to the learner’s life. The course will examine age appropriate and functional skills instruction based on the adaptive skills of students with mental retardation/developmental disabilities. Students will utilize research-supported instructional strategies and practices, including the functional embedded skills approach, community-based instruction, task analysis, multi-sensory, and concrete/manipulative techniques. The course will emphasize culturally responsive functional life skills relevant to independence in the community, personal living, and employment, including accessing public transportation, cooking, shopping, laundry, functional reading, and sexuality. Students will explore the use of integrated community and adult service agencies.

5403 Advanced Course in Developmental Reading - Primary Level
Analysis of sequential growth in reading from the preschool level through the early elementary years. Examination of the reading process and instructional procedures. Pre: Permission of Associate Dean of the School of Education.

5413 Advanced Course in Developmental Reading - Intermediate/Secondary
Examination of the developmental reading curriculum at intermediate, middle school, and secondary levels, including evaluation of teaching methods and materials. Pre: Permission of Associate Dean of the School of Education.

5423 Foundations of Literacy
This course is designed as an elective course to provide the theoretical background and instructional strategies of literacy instruction by examining phonemic awareness, phonics, fluency, vocabulary, comprehension, and writing as well as to develop instructional strategies and concepts to support diverse needs of students, to assess and analyze student literacy learning, and to plan and reflect upon literacy instruction.

5433 Diagnostic and Correction Techniques in Reading
Diagnosis of reading disabilities are conducted and remedial measures are recommended. Includes methods and materials for the establishment of appropriate reading levels. Specific current reading assessments will be administered, scored,
and educational goals will be written for specific instructional needs. Pre: EDUC 5283 and Permission of Associate Dean of the School of Education.

5453 Clinical Procedures in Reading
Candidates will apply information gathered from diagnostic procedures to plan and implement remediation for an individual student. Knowledge of inhibiting psychological, intellectual, emotional, social, cultural, and educational factors which may contribute to reading failure will be utilized. This course requires 15 hours of clinical experience. Pre: EDUC 5433 and Permission of Associate Dean of the School of Education.

5500 Internship for Educational Leadership
In this capstone practicum, candidates will apply their knowledge, skills, and dispositions in field-based experiences related to building-level principalship. In collaboration with the mentor administrator, the candidate will take a leadership role in the administration of a school with emphasis upon the areas of curriculum, personnel, school organization, legal aspects, and finance. Pre: Permission from Associate Dean of the School of Education.

5500 Reading Practicum
Supervised clinical (field) experience pertaining to the importance of, demonstration of, and facilitation of professional learning and leadership as a career-long effort and responsibility. This course is intended as a capstone experience to apply knowledge, skills, and dispositions as a literacy leader. Course must be taken during the final semester of coursework. This course requires a minimum of 15 hours of clinical experience. Pre: Permission from program chair.

5500 School Counseling Practicum
Supervised clinical (field) experience in which candidates are able to apply their professional practice in the following areas: human development and guidance, diversity, assessment, career education, home and community involvement, collaboration with stakeholders, professional ethical codes, and professional development. During the clinical experience, candidates will demonstrate the ability to work with colleagues to advance the profession. Course must be taken during the final semester of coursework. Pre: Permission from program chair.

5503 Curricular and Supervisory Problems in Reading
Designed to aid reading specialists in interrelating the various aspects of the reading program. Explores the scope and sequence of the reading curriculum, innovative methods and materials, important reading research, and role(s) of the reading specialist. Also considers how to evaluate or develop reading programs and how to interpret the reading program to others. Pre: Permission of Associate Dean of the School of Education.

5513 Nature and Needs of the Gifted
Study of characteristics, needs, and means of identifying gifted and talented individuals, consideration of problems of personal, educational, and social development.

5523 Educational Procedures for the Gifted
Strategies for the education of gifted individuals, pre-kindergarten through grade twelve. Methods of assessment, program planning to meet individual needs, techniques for developing higher cognitive skills (including techniques for inquiry, simulation, and problem solving). Exploration of various programs and administrative arrangements currently in use in schools as well as other related issues.

5532 Practicum in Remediation of Learning Problems I
Supervised experience in instructional procedures for students at the primary level; includes instruction of individual, small groups, and/or whole classes with diverse populations in specific reading strategies. This course requires 15 hours of clinical experience at the early childhood and elementary grade levels. Pre: EDUC 5403 or may be taken concurrently with EDUC 5403 and Permission of Associate Dean of the School of Education.

5533 Early Childhood Development and Learning
This course prepares early childhood professionals to use knowledge of how children develop and learn to provide opportunities that support the physical, social, emotional, language, cognitive, and aesthetic development of all young children from birth through age eight. This course also provides knowledge of how students differ in their development and prepares future teachers to apply knowledge of cultural, linguistic, and disabilities to political, social, and family contexts. This course also includes five (5) hours of observation of young children in Head Start, child care centers, and/or home daycares.

5542 Practicum in Remediation of Learning Problems II
Supervised experience in instructional procedures for students at the intermediate/secondary level; includes instruction of individual, small groups, and/or whole classes with diverse populations in specific reading strategies. This course requires 15 hours of clinical experience at the middle and high school grade levels. Pre: EDUC 5413 or may be taken concurrently with EDUC 5413 and Permission of Associate Dean of the School of Education.

5543 Early Childhood Curriculum Implementation
This course prepares early childhood professionals to use knowledge of how children develop and learn to provide opportunities that support the physical, social, emotional, language, cognitive, and aesthetic development of all young children from birth through age eight. The course also provides knowledge of cultural and linguistic disabilities to political, social, and family contexts. This course also includes five (5) hours of observation of young children in Head Start, child care centers, and/or home daycares.

5553 Methods and Materials in the Education of the Gifted
Consideration of the most appropriate instructional strategies and materials to be utilized with the gifted, placing emphasis on the designing of materials and development of appropriate curricular units. Techniques are used for individualizing instruction.

5583 Assessment and Diagnosis in Special Education
This course is designed to provide the student with an understanding of the assessment process and of the concrete, practical skills necessary to assess persons at all levels (PK-12) with mild/moderate disabilities, including mild learning disabilities, mild emotional and behavioral disabilities, and mild mental disabilities. Ethical concerns relating to assessment and the legal provisions and regulations of the assessment process will be studied. Students will investigate the strengths, weaknesses, and procedures required to implement both informal assessment instruments. The criteria for the selection of assessment tools, including the influence of diversity and appropriateness, will be studied. Students will learn to interpret data and understand the relationship between assessment, placement, and instructional decisions regarding the individual needs of special learners.
Early Childhood Assessment

This course will cover developmentally appropriate methods of assessment of the young child. It will offer the future ECE teacher different methods of conducting naturalistic assessment and research. Students will complete twenty (20) formal and informal child, group, or program assessments during ten (10) hours of observation.

Leadership

This course will examine the role of the superintendent, the nature and importance of leadership, the traits, motives and characteristics of leaders, the different styles of leadership (charismatic, transformational, etc.), and the behavior of effective leadership.

School Business Management

This course will look at the activities of a superintendent/business administrator in the day-to-day activities as they concern school finance. Information will be presented as a “nuts and bolts” approach and will include items such as the yearly estimate of needs, the formation of a budget, working with the auditors, and state certification requirements.

School Legal Issues

This is the second law class for those interested in pursuing a standard superintendent certification. The class will review issues related to employee contracts and/or negotiations, school bond issues, state and federal requirements, and Supreme Court decisions that have affected education.

School Personnel and Administration

Examination of the functions of school personnel are considered. Emphasis is also placed on recruitment, selection, and placement. Problems and techniques involved in the administration of public educational institutions. Pre: Permission of Associate Dean of the School of Education.

Principles of Public School Administration

Oklahoma School law; State Board of Education requirements; principles of public school finance; philosophy of administration; school organization; school policy development; school board relations; public relations; selection of teachers; utilization of school plant; school records and accounts; transportation; and school census will be discussed. Pre: Permission of Associate Dean of the School of Education.

Public School Finance

Sources of school finance, control of expenditure, general principles of financial administration. Pre: Permission of Associate Dean of the School of Education.

School and Public Relations

A detailed and comprehensive presentation of the methods and media for building and sustaining good public relations for public educational institutions. Also, the examination and development of effective communication techniques with emphasis directed towards teachers, students, and parents. Pre: Permission of Associate Dean of the School of Education.

Supervision of Teaching

Examination and development of skills in the use of effective practices in supervision, group processes, personnel administration, and evaluation of teachers. Pre: Permission of Associate Dean of the School of Education.

Implementing State and Federal Requirements

A study of the history of the federal and state governments' role in education; a study of current school laws, rules, regulations, and policies that affect the school; a study of educational trends that will be affected by pending or anticipated laws, rules, regulations, and policies. Pre: Permission of Associate Dean of the School of Education.

School Plant Design and Operation

A study of plant design and operation of school facilities. Coverage of the major steps necessary in the planning, selling, construction, and maintenance stages of a school facility program.

Introduction to Guidance and Counseling

Understanding the philosophy, principles, and practices which are basic to a sound guidance program at the elementary and secondary school level, and an understanding of the supportive roles of teachers, administrators, and other personnel. Pre: Permission of Associate Dean of the School of Education.

Multicultural Education

An introduction to the development of required leadership philosophies and principles necessary in establishing multicultural education. This course will cover institutional and individual practices; a review of instruments for the evaluation of behaviors; and strategies for involvement in programs with public school systems.

Developmental Guidance for School Counselors

The total guidance program desired for an elementary school is presented. The different services (testing, career education, counseling, etc.) are discussed and an individual plan is developed along with methods of implementation. Pre: Permission of Associate Dean of the School of Education.

Higher Education Philosophy and Practice

The focus of this course is the philosophy and practice of the colleges in America. It addresses higher education's historical roots and development, programs and services, finances and sources of support, governance, current issues affecting its role and mission, and how adult learning theory is reflected in these issues.

Adult Learning: Theory and Practice

This course examines learning theories and their application as they relate to adult learners in higher education (andro-gagy). The focus addresses the creation of pedagogy for college courses that attends to the learning styles and characteristics of a diverse student population in the 21st Century. Topics covered include, but are not limited to, self-directed learning, transformative learning, experience and learning, motivation and learning, adult learning in the digital age, critical thinking, and critical perspectives.

Adult Cognitive Styles and Individual Differences

This course provides an overview of the different micro-cultures to which we belong. Students will become aware of cultural differences and inequalities in the nation and in the world. The course addresses issues of race, ethnicity, gender, class, language, religion, ability, and age, areas that allow some groups to have greater societal benefits than others. The primary goal is to help affirm cultural differences while realizing that individuals across cultures have many similarities.
5933 Classroom Research and Institutional Effectiveness
A systematic analysis of classroom and institutional problems, including the techniques of collection, interpretation of data, and the reporting of results. This course is designed to acquaint students with the methods and techniques associated with classroom research as well as the various types of research currently in use.

5943 Leadership in Adult Education Venues
The focus of this course is the concept of providing leadership in learning environments. The course defines leadership and studies the traits, styles, and approaches to leadership, and current issues in leadership. All of these areas are studied in the context of higher education.

5953 Institutional Management
The course examines the various aspects of managing institutions in general and higher education in particular. Emphasis is placed upon the structure and organization of institutions and their various components, including academics, human resources, student services, finances, planning, and institutional research.

DIVISION OF NURSING
DOCTOR OF NURSING PRACTICE COURSES (NURS)

6010 Program Orientation
Course provides the orientation for the DNP Program at Northwestern. Emphasis will be placed on delivery modalities, resource utilization, and scholarly writing. Pre: Acceptance into program.

6113 Advanced Pathophysiology
Course provides graduate-level content of physiology, genomics, and pathophysiology that is necessary for understanding the scientific basis of advanced nursing practice. In-depth study of the pathophysiological basis of disease as it impacts individuals across the life span. Student will gain an understanding of the mechanisms underlying diseases and their clinical manifestations to provide a basis for clinical decisions related to diagnostic tests and therapeutic regimens. (AACN Essentials I and VIII; NONPF Criteria -- Scientific Foundations Competencies). Pre: Acceptance into program.

6123 Biostatistics for Advanced Nursing Practice
Course examines the statistical methods used in the biological, social, and health care sciences. Emphasis is placed on the understanding of statistical procedures and analysis of data fundamental to critical evaluation of health services and nursing research. (AACN Essentials I and III; NONPF Criteria -- Scientific Foundations Competencies, Practice Inquiry Competencies). Pre: Acceptance into program.

6133 Advanced Holistic Assessment
Course provides a theoretical basis for the integration of the health history, physical examination, and diagnostic evaluation to develop a model for advanced nursing practice assessment. [Includes Summer Residency Intensive]. (AACN Essentials I and VIII; NONPF Criteria -- Scientific Foundations Competencies and Independent Practice Competencies). Pre: NURS 6113.

6143 Advanced Pharmacotherapeutics
Course provides advanced knowledge of commonly prescribed pharmacologic agents. Rationales for the use of pharmacologic agents in the treatment of selected health problems are presented. Clinical considerations of drug selection and initiation, maintenance and discontinuation of drug treatment are examined. Legal requirements and implications for pharmacotherapy are reviewed. (AACN Essentials I and VIII: NONPF Criteria -- Scientific Foundations Competencies and Independent Practice Competencies). Pre: NURS 6113.

6153 Advanced Research Methods
Course provides an in-depth study of nursing research methodologies. The focus is on interrelationships among theory, advanced nursing practice, and research. Emphasis is placed on developing skills used in the critical analysis of nursing research for the purpose of determining the applicability and integration of the research to advanced nursing practice. Research focusing on practice guidelines, therapeutic management, and cost containment will be explored. (AACN Essentials I and III; NONPF Criteria -- Scientific Foundations Competencies, Practice Inquiry Competencies; Ethics Competencies). Pre: NURS 6123.

6213 Theory for Evidence-Based Advanced Nursing Practice
Course examines the nature of theory development and relates it to health and health care delivery phenomena. Nursing theories as well as theories from social, biophysical, and organizational sciences are integrated to examine their application to advanced nursing practice. (AACN Essentials I and II; NONPF Criteria -- Scientific Foundations Competencies).

6223 Evidence-Based Practice and Scholarship in Advanced Practice Nursing
Course focuses on how to translate, evaluate, and disseminate evidence in a contemporary health care environment. Individual, organizational, and global barriers to translating evidence into nursing practice are discussed. Evidence will be summarized and an action plan will be developed to produce valid and reliable clinical recommendations for practice. An evaluation plan that includes the patient, health care providers, and system outcome measures will be designed to measure the success of the evidence-based practice initiative. (AACN Essentials III; NONPF Criteria Leadership Competencies, Technology and Information Literacy Competencies, and Health Delivery System Competencies). Pre: NURS 6123 & 6153

6243 Population Health and Health Promotion
Course is designed to examine the determinants of health and distribution of disease. Epidemiological, demographic, and environmental data, national reports and surveys, and legislation are used to address trends and establish priorities to improve the health status of the population. Course focuses on the leading causes of death and disability as well as key issues in behavioral health, environmental health, occupational health, and infectious disease. Planning and development of programs to improve the health status of the population, including the consideration of health disparities, cultural competence, and social justice in the development of health-related programs, are discussed. (AACN Essentials VII; NONPF Criteria --Scientific Foundations Competencies, Practice Inquiry Competencies, Technology and Information Literacy Competencies, Policy Competencies, Health Delivery Systems Competencies).
6253 Health Systems -- Informatics and Quality Management
Course is designed to provide an analysis of health care delivery and policy trends including their effects on the organization of clinical and health systems. Course explores policy, regulatory, quality improvement, and technological impacts in the health-care delivery system and its participants. (AACN Essentials II and IV; NONPF Criteria -- Leadership Competencies, Policy Competencies, Technology and Information Literacy Competencies, Quality Competencies and Health Delivery Systems Competencies).

6263 Health Policy, Ethics, Economics, and Advanced Nursing Practice
Course analyzes the economic and organizational foundations of health care systems. Social, ethical, policy, economic, and global health factors affecting health policy are discussed. The role of health practitioners to influence policy relative to health institutions, government agencies, and patients is emphasized. Ethical and social justice considerations in policy development and implementation are discussed, and models for ethical decision making are explored. (AACN Essentials II and V; NONPF Criteria -- Leadership Competencies, Policy Competencies, Health Delivery Systems Competencies, and Ethics Competencies). Pre: Acceptance into program.

6313 Primary Care of Families -- Adult
Examines the common, acute, and chronic health problems occurring in adults using a holistic approach. Advanced pathophysiology, holistic assessment, and diagnostic strategies specific to the acute and common problems in adults will be stressed. Nursing strategies used to enhance, maintain, and restore health will be emphasized. (AACN Essentials VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6113, 6133, & 6143. Co-Req: NURS 6314.

6314 Primary Care of Families Practicum -- Adult
An individualized, supervised clinical practicum to expand the student's advanced practice competencies in direct patient care as related to the care of adults and their health problems. Focuses on a holistic approach to health care of the adult throughout the life span; incorporating the principles of health promotion, disease prevention, and primary and rehabilitative health care concepts which are applied to the management of adults in the context of their family and community environment. Integrates the knowledge from advanced pathophysiology, assessment and diagnostic strategies specific to acute, common, and complex health problems in adults. Stresses clinical interventions to enhance, maintain, and restore health. Develops skills for collaboration with multidisciplinary teams and effective utilization of community resources. (AACN Essentials VI, VII, and VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6113, 6133, & 6143. Co-Req: 6313.

6333 Primary Care of Families -- Pediatrics
Course examines the common, acute, and chronic health problems occurring in infancy through adolescence using a holistic approach. Advanced pathophysiology, assessment and diagnostic strategies specific to acute and common problems in children will be emphasized. Nursing strategies to enhance, maintain, and restore health will be emphasized. (AACN Essentials VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6113, 6133, & 6143. Co-Req: 6334.

6334 Primary Care of Families Practicum -- Pediatrics
An individualized, supervised clinical practicum to expand the student's advanced practice competencies in direct patient care as related to the care of infants through adolescence and their health problems. Focuses on a holistic approach to health care from infancy through adolescence incorporating the principles of well child care, health promotion, and disease prevention, including the concepts of growth and development, and screening procedures. Emphasizes advanced pathophysiology, assessment and diagnostic strategies specific to acute and common problems in children. Stresses clinical interventions to enhance, maintain, and restore health in context of family and community environments. Develops skills for collaboration with multidisciplinary teams and effective utilization of community resources. (AACN Essentials VI, VII, and VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6113, 6133, & 6143. Co-Req: 6333.

6335 Primary Care of Families -- Women
Course examines the common, acute, and chronic health problems occurring in women using a holistic approach. Integrates the knowledge from advanced pathophysiology, pharmacotherapeutics, and holistic assessment as it relates to health promotion, disease prevention, and management of health problems in women. These include management of uncomplicated pregnancy, contraception, midlife symptoms, and common GYN complaints including sexually transmitted infections and vaginal infections. (AACN Essentials VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6113, 6133, & 6143. Co-Req: 6354.

6354 Primary Care of Families Practicum -- Women
An individualized, supervised clinical practicum to expand the student's advanced practice competencies in direct patient care as related to the care of women and their health problems. Focuses on a holistic approach to health care of women throughout the lifespan; incorporating the principles of health promotion, disease prevention, and primary and rehabilitative health care concepts which are applied to the management of women in the context of their family and community environment. Integrates the knowledge from advanced pathophysiology, assessment and diagnostic strategies specific to acute, common, and complex health problems in adults. Stresses clinical interventions to enhance, maintain, and restore health. Develops skills for collaboration with multidisciplinary teams and effective utilization of community resources. (AACN Essentials VI, VII, and VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6113, 6133, & 6143. Co-Req: 6353.

6373 Gerontology in Primary Care
Course provides students with the requisite knowledge and skills to integrate holistic, high-quality, safe, and developmentally appropriate principles into the primary care of older adults, including the frail elderly. This course explores the normal physiological and psychological changes experienced by older adults in a variety of settings; theories of physical aging are introduced to support this topic. Myths and stereotypes of aging are addressed. Case finding, assessment, decision making, and management of specific health problems and geriatric syndromes are emphasized. The role of the Advance Practice Nurse in the care of older adults is integrated throughout the course, with a focus on evidence-based practice. (AACN Essentials VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6113, 6133, & 6143. Co-Req: 6374.
6374 Primary Care Practicum -- Gerontology
An individualized, supervised clinical practicum to expand the student's advanced practice competencies in direct patient care as related to the care of the elderly and their health problems. Focuses on a holistic approach to health care of the elderly, including the frail elderly; incorporating the principles of health promotion, disease prevention, and primary and rehabilitative health care concepts which are applied to the management of the elderly in the context of their family and community environment. Integrates the knowledge from advanced pathophysiology, assessment and diagnostic strategies specific to acute, common, and complex health problems in adults. Stresses clinical interventions to enhance, maintain, and restore health. Develops skills for collaboration with multidisciplinary teams and effective utilization of community resources. (AACN Essentials VI, VII, and VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6113, 6133, & 6143. Co-Req: 6374.

6412 Advanced Nursing Practice in Rural Communities
Course provides an overview of rural health problems, hazards, and disparities. Focuses on selected conceptual and contextual frameworks needed by advanced practice nurses in the delivery of health care services in rural populations. Recognition of the need for interdisciplinary teamwork in assessment, diagnosis, and intervention for rural-based health promotion/disease prevention interventions are highlighted. Topics covered include health care access and delivery systems, maternal and child health, gender and violence, nutrition and occupational injuries. (AACN Essentials II, V, VI, and VII; NONPF Criteria -- Scientific Inquiry Competencies, Leadership Competencies, Quality Competencies, Practice Inquiry Competencies, Policy Competencies, Health Delivery System Competencies, and Ethics Competencies).

6414 DNP Practicum in Family Nursing
An individualized, supervised clinical practicum to expand the student's advanced practice competencies in independent clinical management of acute and chronic illnesses across the life span highlighting multicultural care. Synthesis of practice management skills pertaining to cost effectiveness, reimbursement for services and time management will be emphasized. Focuses on a holistic approach to health care of patients across the life span; incorporating the principles of health promotion, disease prevention, and primary and rehabilitative health care concepts which are applied to the management of the patients in the context of their family and community environment. Integrates the knowledge from advanced pathophysiology, assessment and diagnostic strategies specific to acute, common, and complex health problems in patients of all ages. Stresses clinical interventions to enhance, maintain, and restore health. Develops skills for collaboration with multidisciplinary teams and effective utilization of community resources. (AACN Essentials VI, VII, and VIII; NONPF Criteria Independent Practice Competencies). Pre: NURS 6313, 6314, 6333, 6334, 6353, 6354, 6373 and 6374. Co-Req: 6541.

6423 Interprofessional Leadership, Collaboration, and Communication
Course focuses on the synthesis of theoretical leadership and interpersonal communication and collaboration concepts with personal and professional values to guide the exploration of complex patient-centered care of individuals, families, communities, and vulnerable populations. Students gain an appreciation for the changing sociocultural context in which interprofessional clinical leadership, collaboration, and communication is practiced. Issues of power, creativity, innovation, ethics, and gender are addressed. (AACN Essentials II and VI; NONPF Criteria Leadership Competencies, Practice Inquiry Competencies, and Health Delivery System Competencies).

6432 Role Development for the DNP
Course focuses on role socialization to activities and responsibilities of the advanced practice doctorate. Career trajectories for the DNP with roles in leadership and clinical practice are explored. Emphasis will be placed on the standards of practice, requirements for regulation of, and socialization into advanced nursing roles. Students will use critical thinking skills to examine barriers and opportunities for nurses in advanced roles and will propose a plan for transitioning into their new role. The importance of mentors, organizations, networks, and collaborators is emphasized, and selected nurse leaders are explored in depth as role models for use in developing career goals and trajectories. (AACN Essentials VIII; NONPF Criteria Leadership Competencies, Quality Competencies, Practice Inquiry Competencies, Health Delivery System Competencies, and Independent Practice Competencies). Pre: NURS 6423.

6511 DNP Project (Part I)
Project focuses on facilitating student progress through the development, implementation, analysis, evaluation, and dissemination of an evidence-based quality improvement project designed to remediate an identified practice phenomenon. Project completion requires demonstration of integration, synthesis, and application of advanced practice competencies. The project may be a practice change, quality and safety improvement, clinical program evaluation, or evaluation of practice models. During the DNP Project course students refine their project idea and then plan, implement, and evaluate the project. Project requires a minimum of 60 clinical experience hours defined as time spent working on the project in the practice setting. The nature of the practice hours will vary depending on the nature of the scholarly project and practice experience and is mutually agreed upon between the student, faculty advisor, and cooperating agencies. Practice hours related to project completion are documented by the student and approved by the faculty advisor at regular intervals. Practice hour logs and project deliverables are approved by the faculty advisor and filed in the online course site. Graded on a Pass/Fail basis. Minimum of 4 credits required over four semesters. (AACN Essentials -- All; NONPF Criteria All). Pre: NURS 6123, 6153, 6213, 6233, 6432, 6253, & Faculty Approval. Based upon the AACN DNP Essentials and the NONPF Program Criteria, three areas of course work comprise the BSN-to-DNP curriculum. Focus areas include Scientific Foundations for Advanced Nursing Practice, Clinical Excellence in Advanced Nursing Practice, and Leadership in Advanced Nursing Practice.

6521 DNP Project (Part 2)
Project focuses on facilitating student progress through the development, implementation, analysis, evaluation, and dissemination of an evidence-based quality improvement project designed to remediate an identified practice phenomenon. Project completion requires demonstration of integration, synthesis, and application of advanced practice competencies. The project may be a practice change, quality and safety improvement, clinical program evaluation, or evaluation of practice models. During the DNP Project course students refine their project idea and then plan, implement, and evaluate the project. Project requires a minimum of 60 clinical experience hours defined as time spent working on the project in the practice setting. The nature of the practice hours will vary depending on the nature of the scholarly project and practice experience and is mutually agreed upon between the student, faculty advisor, and cooperating agencies. Practice hours related to project completion are documented by the student and approved by the
faculty advisor at regular intervals. Practice hour logs and project deliverables are approved by the faculty advisor and filed in the online course site. Graded on a Pass/Fail basis. Minimum of 4 credits required over four semesters. (AACN Essentials -- All; NONPF Criteria All). Pre: NURS 6123, 6153, 6233, 6432, 6253, 6511, & Faculty Approval. Based upon the AACN DNP Essentials and the NONPF Program Criteria, three areas of course work comprise the BSN-to-DNP curriculum. Focus areas include Scientific Foundations for Advanced Nursing Practice, Clinical Excellence in Advanced Nursing Practice, and Leadership in Advanced Nursing Practice.

6531 DNP Project (Part 3)
Project focuses on facilitating student progress through the development, implementation, analysis, evaluation, and dissemination of an evidence-based quality improvement project designed to remediate an identified practice phenomenon. Project completion requires demonstration of integration, synthesis, and application of advanced practice competencies. The project may be a practice change, quality and safety improvement, clinical program evaluation, or evaluation of practice models. During the DNP Project course students refine their project idea and then plan, implement, and evaluate the project. Project requires a minimum of 60 clinical experience hours defined as time spent working on the project in the practice setting. The nature of the practice hours will vary depending on the nature of the scholarly project and practice experience and is mutually agreed upon between the student, faculty advisor, and cooperating agencies. Practice hours related to project completion are documented by the student and approved by the faculty advisor at regular intervals. Practice hour logs and project deliverables are approved by the faculty advisor and filed in the online course site. Graded on a Pass/Fail basis. Minimum of 4 credits required over four semesters. (AACN Essentials -- All; NONPF Criteria All). Pre: NURS 6123, 6153, 6233, 6432, 6253, 6521, & Faculty Approval. Based upon the AACN DNP Essentials and the NONPF Program Criteria, three areas of course work comprise the BSN-to-DNP curriculum. Focus areas include Scientific Foundations for Advanced Nursing Practice, Clinical Excellence in Advanced Nursing Practice, and Leadership in Advanced Nursing Practice.

6541 DNP Project (Part 4)
Project focuses on facilitating student progress through the development, implementation, analysis, evaluation, and dissemination of an evidence-based quality improvement project designed to remediate an identified practice phenomenon. Project completion requires demonstration of integration, synthesis, and application of advanced practice competencies. The project may be a practice change, quality and safety improvement, clinical program evaluation, or evaluation of practice models. During the DNP Project course students refine their project idea and then plan, implement, and evaluate the project. Project requires a minimum of 60 clinical experience hours defined as time spent working on the project in the practice setting. The nature of the practice hours will vary depending on the nature of the scholarly project and practice experience and is mutually agreed upon between the student, faculty advisor, and cooperating agencies. Practice hours related to project completion are documented by the student and approved by the faculty advisor at regular intervals. Practice hour logs and project deliverables are approved by the faculty advisor and filed in the online course site. Graded on a Pass/Fail basis. Minimum of 4 credits required over four semesters. (AACN Essentials -- All; NONPF Criteria All). Pre: NURS 6123, 6153, 6233, 6432, 6253, 6531, & Faculty Approval. Based upon the AACN DNP Essentials and the NONPF Program Criteria, three areas of course work comprise the BSN-to-DNP curriculum. Focus areas include Scientific Foundations for Advanced Nursing Practice, Clinical Excellence in Advanced Nursing Practice, and Leadership in Advanced Nursing Practice.

ADDITIONAL COURSE OFFERINGS ~ ALL DEPARTMENTS

5170* Individual Study (1-4 hours)
Directed intensive study on selected problems or special subject, based on approved outline or plan; conference, oral, and written reports. Pre: 16 hours in chosen academic area. Offered by all departments.

5180* Seminar (1-4 hours)
Directed intensive study on selected problem or special topic. Pre: Permission of Department. Offered by all departments.

5190** Readings (1-3 hours)
Directed reading and discussion of selected current topics in appropriate academic area. Pre: Permission of chosen department. Offered by all departments.

5300* Short Course (Name of Short Course) (1-3 hours)
A course which is continuous in study for a limited duration. The intensive study presents special subjects and/or topics. Offered by all departments.

5330** Thesis (prefix to course number will depend on title of thesis) (1-6 hours)
A research report. Problem, outline, and report will be directed by the graduate thesis committee.

*Courses using these numbers must be approved by the Graduate Committee prior to the semester they appear in the schedule.

**Courses using these numbers must be approved by a student's Graduate Advisory Committee in order to be eligible for a graduate plan of study.
