

Photo, Video and Audio Release

Dear Parent and/or Guardian,

Through the use of our product Remote Proctor Now, Software Secure, Inc. offers students a reliable and flexible distance learning experience. By downloading our Remote Proctor Now software and running the application, which continuously monitors exam conditions, students are able to take tests virtually anytime, using their own familiar equipment, while at the same time maintaining the highest degree of academic integrity.

The Remote Proctor Now software includes various mechanisms that authenticate the student's exam experience, including but not limited to (i) taking a picture of the student's face, (ii) scanning the room to ensure compliance with school exam policy, (iii) taking a picture of the student's school ID, (iv) recording screen shots of the student's desktop for later review by our third-party Certified Video Review Specialists, and (v) recording audio and video images of the student and his/her exam environment during the course of the exam for later review by our third-party Certified Video Review Specialists. Pictures, videos and audio recordings captured by Remote Proctor Now will be used by Software Secure, Inc. and designated third parties to monitor, administer and proctor the student's distance examinations.

Before we can take these pictures, videos or recordings, however, we need the permission of the student's parent or guardian. By signing this form, you will give Software Secure, Inc. permission to take the photographs, videos and recordings of your child required to authenticate his/her distance examination experience. Children without signed releases will not be permitted to access the Remote Proctor Now software.

We appreciate your understanding and cooperation!

I hereby grant Software Secure, Inc., a Delaware corporation, and its assigns, successors in interest, employees, designees, and those acting on behalf of Software Secure, Inc. (collectively, "Software Secure"), the irrevocable unrestricted right to take or record audio, pictures and/or video (collectively, "Images") of my daughter/son identified below (the "Child"), while the Child is using the Remote Proctor Now software to administer an examination and use the Images for the purpose of monitoring, administering, proctoring or providing technical support of examinations.

I represent and warrant that I have read this release, that I am a parent or legal guardian of the Child and I understand that Software Secure would not use the Images without first receiving a copy of this release signed by a parent or legal guardian of the Child, as set forth below. This release shall survive the execution and delivery hereof and shall be binding on the Child, its legal representatives, heirs and assigns.
