# Make Your Emails Work for Everyone

*Natasha Brand, MSc, GradCert Ed.*

*NEO A & M College*

*Co-chair COLE Accessibility Subcommittee*

*Oklahoma AbleTech Advisory Council Member*

---

# Session Objectives

**IDENTIFY COMMON  
ACCESSIBILITY  
ISSUES IN EMAILS**

**APPLY PRACTICAL  
FIXES USING 6  
CORE STRATEGIES**

**CREATE ACCESSIBLE  
EMAILS &  
SIGNATURES**

**LEAVE WITH  
TOOLS AND  
RESOURCES**

# What's Wrong with This Email?

# What did you find?

**Image only  
flyer – no  
email body**

**Low-  
contrast or  
poor font  
choice**

**Unclear  
subject  
line**

**“Click  
here” link**

**Signature  
as an  
image**

# What to Fix & Why It Matters

## Top 6 Email Accessibility Mistakes

### Mistake

- ✗ Flyer-only emails
- ✗ No alt text on images
- ✗ Poor contrast or cursive fonts
- ✗ Unclear link text (“Click here”)
- ✗ Image-only signatures
- ✗ No subject line or poor heading structure

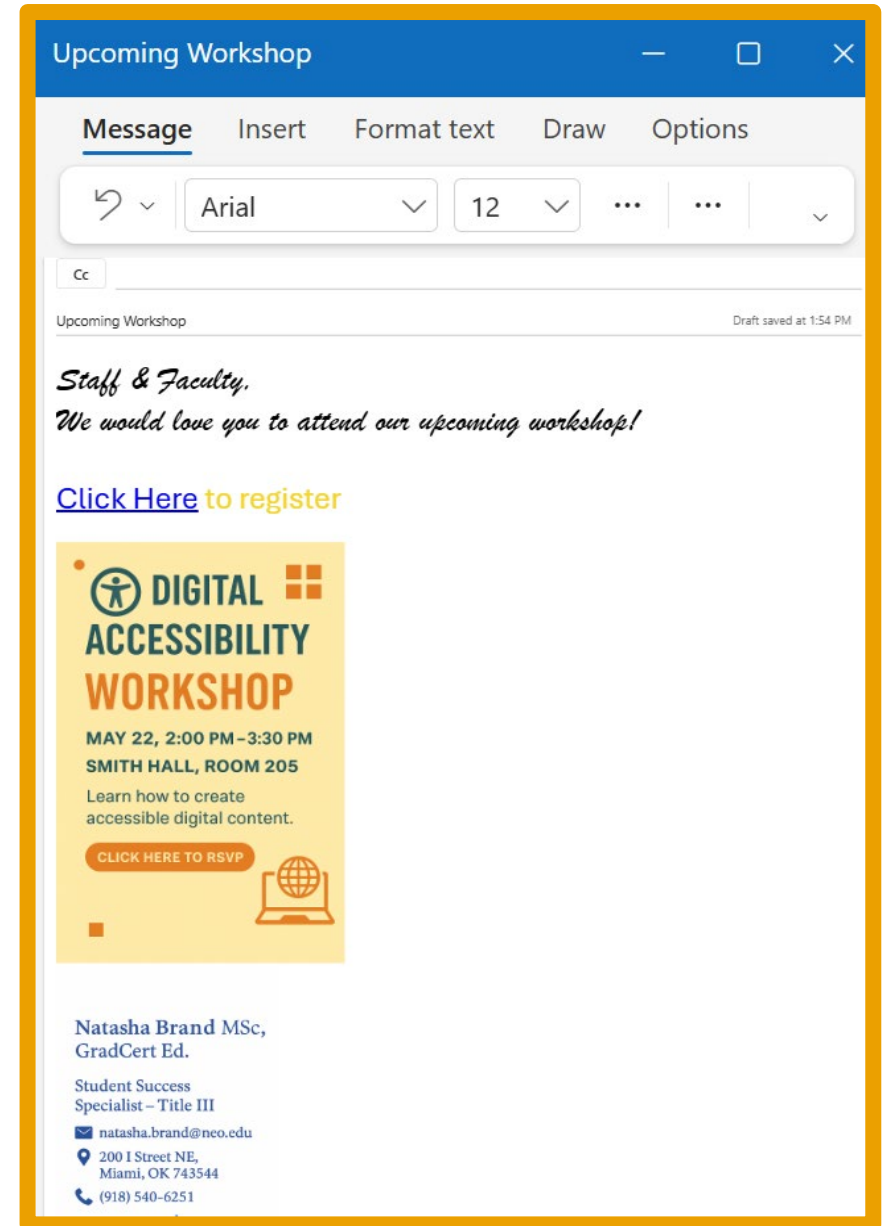

### Why It Matters

- Content not readable by screen readers
- Visually impaired users miss the message
- Hard to read for many users
- Confusing with assistive tech
- Name/title/contact info can’t be read or copied
- Disrupts navigation for screen readers

*Make This Email Accessible*

# Make This Email Accessible:

## Step-by-Step Fix

Step	Action	Why
1.	Add a descriptive subject line	Helps screen reader users navigate
2.	Copy flyer content into the email body	Ensures everyone gets the message
3.	Add alt text to any remaining images	Gives meaning to non-sighted users
4.	Use accessible fonts and high-contrast colors	Improves readability
5.	Use clear, descriptive link text	Helps users know where links go
6.	Create a text-based signature with typed name, title, and contact	Ensures info is searchable, selectable, and screen reader-friendly

# Email Signature Check!

## Step 1: Open Your Email Signature

- Open your email, select a New Mail or your email signature

## Step 2: Review for Accessibility

- Is my signature text-based (not just an image)?
- Does it include clear, plain text contact info?
- If I use a logo or photo, does it have alt text?
- Is the font easy to read and high contrast?
- Are icons Unicode text (✉, 📞) rather than decorative images?

---

# Group Discussion

Identify one thing you would change in your own signature to improve accessibility.

Share with the group:

What's one small adjustment you can make today?
