

Measure 3: The Oklahoma Subject Area Test (OSAT)

What: The OSAT assesses knowledge in the specified content area. A passing score (240) on the examination in which a completer is seeking certification is a requirement of the state of Oklahoma for licensure. It is not a program completion requirement of the EPP.

When: The OSAT is taken by advanced-level candidates in Educational Leadership (building level); Reading Specialist; School Counseling. A candidate's advisor recommends the appropriate time at which the candidate should take the exam based on completion of pertinent coursework. It is the candidate's decision as to when to take the test.

Data Reporting: Data from the OSAT is sent to the EPP via the Oklahoma Office of Educational Quality and Accountability (OEQA), the entity responsible for the design, implementation, and monitoring of the OSAT on a state-wide basis. The data in the table below reflect the pass rate of the EPP in each advanced certification subject area during the 2021-2022 test year as provided by OEQA. The Teacher Education Assessment Management System (TEAMS) Committee reviews the data on an annual basis and makes recommendations for program improvement to the EPP's policy-making body, the Teacher Education Committee, based upon the analysis. The data show that the EPP's pass rate is above the state average in each of the advanced programs that lead to certification (Educational Leadership - Comprehensive, Reading Specialist, School Counseling).
