

HOW-TO SESSION: MEDIA

OKLIS Virtual Session

Preparing for the ADA Compliance Deadline

Clarissa Anderson

Today's Agenda

- **Image description / alternative text (“alt text”)**
 - When to use
 - Best practices
 - Creating and evaluating alt text
- **Live captioning and transcription**
 - Examples
 - Quality
- **Accessible design for media**
 - Graphic design
 - Best practices
- **Resources and tools**

Image Description / Alternative Text

Purpose of Images in Instructional Content

Informative Images

Represent concepts and information, and have a purpose

Decorative Images

Added for aesthetics; do not add additional value

Identifying Decorative Images

Can you understand the page if the image is covered up?

Does surrounding text include all the same information?

Was the image added just to look nice or to inform?

Why Alternative Text (“alt text”)?

- Assist users with vision impairments
- Support for users with cognitive and learning disabilities
- Limited internet access or slow connections
- Compatibility with text-only browsers and assistive technology

Alt Text Best Practices

Describes **meaning** and **context** of **informative** images

No alt text for **decorative** images
(mark decorative)

Concise: No more than 125 characters

Do not write “image of” or use file name

Example of Alt Text

- **Alt text with no detail:** Two women smile for camera
- **Alt text with no context:** Two women display rings on their hands
- **Alt text with detail and context:** Two women display their new class rings during OU's annual ring ceremony

Effective Alt Text: Context Matters!

- **What does the image mean?**
 - Supply chain issues?
 - Cleaning warehouses during the COVID-19 pandemic?
 - Just keeping inventory?
- Always include the **purpose** and **context** of images

Questions When Creating Alt Text

Is this instructional?

What is the purpose/context?

What key details should I include (or not)?

Questions When Evaluating Alt Text

01

How long is my alt text?

02

Is everything necessary?

03

Does it meet my goals?

04

Would it make sense if I
could not see the image?

Demo: Creating & Evaluating Alt Text

- Is this instructional?
- What is the purpose/context?
- What key details should I include?

Evaluating Alt Text

Franklin D. Roosevelt sits at a desk signing a document with a fountain pen, surrounded by a group of formally dressed men in suits. An American flag is visible in the background.

- Correctly identified main subject and action
 - Missing context
 - Unnecessary details included
-
- Revised version: Franklin D. Roosevelt signs the New Deal with Frances Perkins and members of Congress.

Note: Using AI to Enhance Alt Text

Generate Descriptive Alt Text Quickly

- AI tools analyze image content and provide a basic description

Human Revision Necessary

- Only human revision can refine these descriptions to ensure accuracy, relevance, and alignment

Must Ensure Accessibility Goals Met

- Confirm the alt text expresses essential details

Always Double Check Automatic Alt Text!

Example from PowerPoint

(1-2 detailed sentences recommended)

A group of black and white icons

Description automatically generated

Complex Images

- Alt text is **not sufficient** for **complex** images
- Also add a description and/or caption
- Add accompanying data table for graphs where possible

Live Captioning & Transcription

Why Captioning and Transcription?

- Benefits the following users:
 - Have a hearing impairment
 - Have a cognitive or learning disability
 - In a very loud or very quiet environment
 - English language learners
 - Also aids in overall attention and comprehension

Live Captioning: Zoom Meetings (Online or Hybrid Courses)

Not a substitute
for specific
accommodations

Image from DU
Ed-Tech
Knowledge Base
(2021)

Live Captioning: PowerPoint (Face-to-face Courses)

- Microsoft Video: Live captions & subtitles
- Present with real-time, automatic captions or subtitles in PowerPoint

Live Captioning: Microsoft Teams

Use live captions in Microsoft Teams meetings

Audio Only? Requires Transcript

Audio Description

Decision Chart

Quality Video Captioning

- AI-generated captions and transcripts can be a **good resource**
- However, they are **not ADA compliant**
 - Requires human editing for accuracy
 - Must also note additional noises/sounds
- How
 - Manual editing and/or professional captioning services
 - Your institution may have staff or funding available

Accessible Design for Media

Best Practices for Typeface Formatting

B

Bold: for general emphasis

U

Underline: reserve for hyperlinks

I

Italics: use sparingly

A^A

ALL CAPS: for acronyms

Color: keep it high-contrast

↕ A

Size: not too small; at least 12 pt font

Note: Screen readers do not generally indicate formatting for emphasis, so emphasis must be conveyed in additional ways

Accessibility Considerations in Video

Graphic Design

Sufficient Contrast

Color blindness and color-coding

Accessible text formatting

Does reading this font require a little effort?
Italics, underlining, and expanded fonts can hurt readability.
LOOK AT HOW THE LETTERS FIT TOGETHER. ALL CAPS AND CONDENSED SPACING CAN MAKE TEXT DIFFICULT TO READ. FONT COLORS AND CONTRASTS CAUSE ADDITIONAL ISSUES.

Video Production

Present and accurate captions (>99%)

Audio Description
* as needed

Flashing or quick moving content

Best Practices for Recording with Accessibility in Mind

- Share associated resources and lecture slides
- Describe what you are doing or what is on screen when annotating or screen sharing
- Reduce background noise and keep in mind sound quality
- Speak reasonably slowly and clearly
- Cut longer videos into smaller chunks
- Consider using a script or outline
